2 Unpostable Codes - GUF

Unpostable transactions are those transactions which cannot be posted to the Master File. A transaction which fails to post to an account at MCC is returned to the Campus for corrective action. Each SC is responsible for maintaining a complete record on tape of all unresolved unpostables originating from the SC. New unpostable items are added and corrected items are deleted from this tape. Each week a Martinsburg Computing Center created unpostable tape is received at the SC. From this tape realtime is updated and information can be obtained via GUF Command Codes. Additionally, an Unpostable Register and several control listings are generated and maintained to insure the later correction or nullification of the unpostable items. Unpostable Codes (UPC) identify the condition which caused the transaction to be unpostable. See IRM 3.12.179 (SC Error Resolution of IMF and BMF Unpostables) for additional information.

3 Unpostable Codes - IMF

All IMF Unpostable Codes (UPC) will be three numeric positions. There will also be a 1 position Reason Code. Comprehensive unpostable code descriptions are found in the sections referenced for each unpostable with the exception of various UPC 29X.

UPC	RC	Description
	2	TC 131 type 01 with a negative state repayment amount that would cause the net state repayment amount of all type 01 TC 131's with matching agency, sub-agency, and year of original offset to be less than zero.
	3	Unpost any TC 011, 013 (with reverse validity), 040, or 041 attempting to post to an account containing an unreversed TC 898 with a transaction date that is within 6 years of the current 23C date. Note that a TC 898 is considered reversed if the net of TC 898/899/76X all with matching OTN net to 0. Include memo money in the netting. Also note that these transactions will resequence 1 week prior to unposting. Bypass this unpostable if the Scrambled SSN indicator is set to 10 or 12.
	4	Unpost TC 290 containing reference number 897 attempting to post to a module containing a DMF offset (TC 896) with a transaction date greater than 6 years from the current date.
	5	Unpost TC 290 containing a TC 766 and OTN if the module contains a TC 898 with a transaction date greater than 6 years from the current date.
135	0	Unpost a TC 29X blocked 290-299 for a debit or zero amount, input to a module that does not contain a TC 150.
136	0	TC 150 containing Computer Condition Code A, F or 9, FSC 2, and the DECD literal is not present in the name line.
	1	TC 150 with Primary SSN starting with 9 containing EIC Computer from section 6 of the input return or containing a 1 in position 1 of the exemption code field. Bypass these checks if the SSN is in the ITIN range (middle 2 digits are 70-80). Also bypass the exemption portion of the unpostable if the Exemption Positions Verified field contains a 0 in position 1 or if the return contains RPC O.
137	1	TC 898 with doc code 45 if after resequencing for 10 cycles, the module does not contain a TC 840 with matching DLN.
	2	<ul style="list-style-type: none"> ▪ When matching against a refund posted by CPE (has DD portion of posting cycle = 08), if the doc code of the TC 898 is 77, the transaction date must be within 12 days of a prior posted EFT TC 846 or within 6 days of a paper refund. Do not perform a date check for a TC 898 with other than doc code 77. When analyzing for this condition, only consider TC 846s that are date the same date or later than the TC 898. ▪ When matching against a refund posted by CADE (has DD portion of posting cycle not = 08), if the doc code of the TC 898 is 77, and if the original refund is EFT, the transaction date of the 898 must be ≤ to the TC 846 minus 2 days and ≥ to the TC 846 minus 8 days. If the original refund is a paper refund, the TC 898 must be dated ≤ the date of the TC 846 and ≥ the TC 846 minus 8 days.
	3	The memo amount of TC898 is greater than the money amount of the matched TC 840/846. If the module contains multiple TC 898/899 transactions with the same date, these must be netted when performing this check. Also unpost the TC 898 if the Split Refund Indicator is not the same as the Split Refund Indicator on the matched TC 846.
	4	TC 899 containing an OTN that does not match the OTN of a prior posted TC 898. Also unpost the TC 899 if the Split Refund Indicator does not match the Split Refund Indicator of a prior posted TC 898.
	5	<ul style="list-style-type: none"> ▪ TC899 with Record Type 1-3 containing a memo amount that exceeds the net amount of a prior posted TC 898/899 with the same OTN minus the net of TC 76X with the same OTN. ▪ TC 899 Record Type 4 if the module does not contain a TC 899 Record Type 2 with matching OTN. If found, unpost unless the net memo amount of the TC 899 Record Type 2 minus posted TC 899 with Record Type 4 (all with matching OTNs) is equal or greater than the input TC 899 Record Type 4.
	6	TC899 containing a Spouse's SSN that does not match the Spouse's SSN of a prior posted TC 89X with the same OTN.
138	0	<ul style="list-style-type: none"> ▪ TC 720, 740, or 841 greater than the net amount of the posted 72X or 84X transactions. ▪ TC 841 b/s 77777 if the module does not contain an EFT TC 846. ▪ Allow TC 740 or TC 841 to be less than TC 840/846 if the module contains TC 898 with a transaction date that is equal to the TC 840/846 as follows: Unpost TC 138 if the input transaction does not match an amount of a prior posted TC 840 or TC 846. Also unpost if the TC 841 contains block and serial 77777 if the module does not contain a prior posted EFT refund. TC 740 will UPC 194 if the amount is less than a prior posted TC 840 or TC 846. Effective 1/1999 and subsequent, due to the FMS takeover of DMF processing, TC 841/740 may be less than the money amount of the TC 840/846 providing the module contains a TC 898. In this situation, the TC 740/841 must be greater than or equal to the TC 840/846 minus TC 898 minus TC 899 with Record Type 1, 2 and 3 minus TC 76X, plus TC 899 Record Type 4. In all cases, the OTN must match the OTN of the TC 898. Be careful if the module has 2 refunds in the same cycle. Need to associate all the transactions correctly. If any of the conditions below are not met unpost TC 841. ▪ TC 841 does not have a Split Refund Indicator that matches a prior posted TC 846.
	1	Reserved.
	2	TC 740 or 841 containing a check number input to a module containing a prior posted unreversed TC 740 or 841 with matching check number.

	2	Unpost a non-RPS TC 150 input to a module containing an unreversed RPS TC 610 or unreversed TC 610 with doc code 19, 70, or 76. Bypass for ELF returns (identified by their unique FLC) or if payment is doc code 19 with a 6 in the 4th position of the EFT Trace Number. The 4 identifies the payment as a credit card payment.
	3	Unpost an RPS TC 150 if the posted RPS TC 610 (or TC 610 with doc code 19, 70, or 76) has been reversed by a TC 612.

If matching to TC 896 with MFT 29, input TC 892 must have blocking series 700-719 and Spouse Indicators must match. If matching to TC 896 with other than MFT 29, input TC 892 must have blocking series other than 700-719.
The TC 632 and 637 Refundable Credit Identification field must match the TC 63X transactions in the same Refundable Credit Identification number series (i.e., 02 and 03) and must be compared to the sum of the money amounts.
When matching any of the transactions from column A with column B allow a tolerance of \$0.99. No tolerance for Doc Code 51 transactions.
TC 767 generated from reference numbers 250, 251, 252 or 330-339 must match a prior posted TC 766 containing reference numbers 250, 251, 252 or 330-339 and cannot exceed the amount. TC 767 input with Doc Code 51 will never contain a reference number. Bypass the check that forces the match on reference number but continue the check that ensures the amount does not exceed the 766.
TC 29X/30X input to MFT 31 that contain Priority Code 9 will bypass UPC 189 for reference numbers 807, 765 and 767. Also bypass for TC 370 blocked 900-949 input to MFT 31 that contain TC 802, 765, or 767. Continue to unpost if other reference numbers or transactions are input that exceed the original amount.
Reference Number 259 is input with a positive sign, which would increase the Making Work Pay Credit to greater than \$800 (\$400 for FSC other than 2).
Note 1 – Unpost TC 29X/30X containing reference number 808, 809, 810 or 811 if the reference number amount exceeds the credit module balance. There is an input check that prevents both of these reference numbers from being input on the same record.

Note 2 –

Note 3 — Unpost TC 29X/30X containing an IRA Reference Number attempting to decrease the net penalty amount below zero. Include the amounts posted in prior adjustments as well as retained in the TC 150. These reference numbers are 160, 162, 194, 195, 233, 235, 236 and 237.

Unpost TC 29X containing a reference number 339 signed positive if the reference number amount exceeds the interest total field. Note that the TC 29X will resequence for 1 cycle prior to unposting.

4

Unpost credit reversal with doc codes 24, 48 and 58 containing the Excess Collection Write-Off Indicator that contains a money amount in excess of the credit module balance. Bypass this condition if the module contains an unreversed TC 608.

5

Unpost TC 971 AC 31, 32, 131 or 132 input to a module with a Total Module Balance that is zero or credit.
