### 2 Discriminate Function (DIF)

Discriminate Function (DIF) is a mathematical technique used to classify income tax returns as to Examination potential.

Under this concept, formulas are developed based on available data and are programmed into the computer to classify returns by assigning weights to certain basic return characteristics. These weights are added together to obtain a composite score for each return processed. This score is used to rank the returns in numerical sequence (highest to lowest). The higher the score, the higher the probability of significant tax change. The highest scored returns are made available to Examination upon request.

The DIF-system involves computer classification to mathematically determine the Examination potential of returns, and manual screening to set the scope of examinations and to select needed workload.

## 3 Partnership Control System (PCS)

Reference IRM 4.29, Partnership Control System (PCS) Handbook, and 2.2, Partnership Control System.

PCS is a real-time system that establishes, links, and controls flow-through returns and their investors. It interfaces with AIMS, Master File and the TIF.

PCS identifies returns subject to TEFRA examination procedures; controls TEFRA and non-TEFRA statutes; generates required statutory correspondence for TEFRA investors including the Notice of Beginning of an Administrative Proceeding (NBAP), 60-Day Letter, FPAA/FSAA, and Appeals settlement correspondence. PCS produces National directories, data base maintenance reports, statute reports, action reports, and management information reports.

PCS has eight command codes which are input real-time:

TSLOD	Establishes and links returns on PCS, generates NBAP'S, requests returns from Master File, and establishes TC424's on AIMS. Each time a new link is established, TC424 will be generated to post to Master File. If
	there is already an open TC 420 at Master File, a TC 421 with DC 99 will be generated and then the TSLOD
	TC 424 will post. IRM Reference 2.2.2
TSCHG	Changes PICF data elements. IRM Reference 2.2.3
TSCLS	Releases the AIMS freeze on investor closure. It is used only as a part of final investor AIMS closure activity.
	IRM Reference 2.2.7
TSDEL	Deletes erroneous linkages. IRM Reference 2.2.5
TSINQ	Researches accounts on PCS displaying PICF, and AIMS information. IRM Reference 2.2.4
TSNOT	Key case records for generation of TEFRA notices during real-time, but notices are generated after weekly
	batch processing. IRM Reference 2.2.6
TSUMY	Displays summarized research for linked key case and their investors. IRM Reference 2.2.9
MSCHG	Changes certain PICF/AIMS data elements of all investors linked to a particular key case. The command
	code is input real-time, but the update is performed via batch processing for all affected accounts. IRM
	Reference 2.2.8

PCS uses real-time processing to update the PICF when establishments and updates are made on the IDRS terminal.

Only MSCHG and TSNOT are processed in the batch mode.

Nightly batch processing includes: updating records nationwide, maintaining the PCS data base, and producing error registers.

Weekly batch processing includes: generating extracts for PCS reports, and notices.

#### Partnership Investor Control File (PICF) Codes

0	No PICF record for this account
1	Linked TEFRA Partnership
2	Linked non-TEFRA Partnership/S Corporation
3	Unlinked Electing Large Partnership (ELP)
4	Investor with both open TEFRA linkage and open non-TEFRA linkage
5	Investor with at least one open TEFRA linkage
6	Investor with at least one open non-TEFRA linkage
7	Investor with no open linkages below it (flow thru)
8	Investor with no open linkages below it (flow thru)

## 4 Examination Return Control System (ERCS)

Reference IRM Part 4, Examining Process, IRM 4.7, Examination Returns Control System (ERCS)

ERCS is an automated inventory management system used by field personnel in both the SB/SE and LB&I Operating Divisions. It is used for controlling tax returns and technical time charges from the time returns arrive until they are closed on the Audit Information Management System (AIMS). TE/GE and Appeals do not use ERCS.

### 5 Audit Information Management System (AIMS)

#### (1) General

Audit Information Management File (AIMF) contains all data elements used by the AIMS System. These data elements are described separately in IRM's 4.4 and 2.8, Audit Information Management Systems (AIMS).

TE/GE and Appeals use the system to control their cases.

The AIMS command codes which authorize the terminal operator to input or receive information to or from the system are found in IRM 2.8.

### (2) AIMS Website

The AIMS Website can be found at: <a href="http://mysbse.web.irs.gov/exam/mis/default.aspx">http://mysbse.web.irs.gov/exam/mis/default.aspx</a>. The AIMS website contains up to date lists of many of the fields on AIMS such as Aging Reason Codes, Disposal Codes, Employee Group Code definitions, Source Codes, etc.

## (3) AIMS Assignee Code

A twelve-digit code used for the management structure so that returns and time applied to returns can be applied to the correct location (Business Operating Division) for management information reports. The AIMS Assignee Code (ACC) is displayed on page 1 of an AMDISA print and Form 5546, Charge Out. The code is broken down into three fields.

Field 1: Primary Business Code consists of 3 digits (Positions 1 - 3). Position 1 is referred to as the "AIMS BOD Code":

- 0 = Not set
- 1 = Wage and Investment (WI)
- 2 = Small Business/Self-Employed (SB)
- 3 = Large and Mid-Sized Business (LM)
- 4 = Tax Exempt/Government Entity (TE)

Positions 2 and 3 are referred to as "IND-AREA-TYPE-CODE".

Field 2: Secondary Business Code consists of 5 digits (Positions 4 - 8). (See below for breakdown by Operating Division)

Field 3: Employee Group Code consists of 4 digits (Positions 9 -12). Position 9 is referred to as "EMPLOYEE-TYPE-CODE":

1 = Revenue Agent

2 = Tax Compliance Officer

5 = Campus

7 = TE/GE

Positions 10 - 12 are referred to as "GROUP-CODE".

## (5) Status and Location

A two digit code used to identify the location of a return.

## Area Office Status Codes (EGC 1XXX and 2XXX)

Appears on Form 5546 and on an AMDIS (A) display. For more information see Exhibit 4.4.1-30.

Location	Status Code	Definition	
PSP	00	Document in Transit - (Computer Generated) — Assembly on hand and return not yet available to the area. Not included in inventory reports. Generated for all bulk ordered returns with no assigned status code. Updates automatically to 06 the weekend after the status code has been in 00 over 14 days.	
	01	Claims and Other Returns in Transit-Claims selected by campus for examination in Area Offices, and other returns selected by campus and which should be associated with related returns prior to forwarding to Area Offices. Immediately upon receipt, the Area must update the status code appropriately.

	06	Awaiting Classification—(Computer Generated)—Returns or related documents awaiting association in the Campus Control Reports Unit or returns in hands of PSP Support Manager which have not been classified or screened. Never update returns to a higher status until it has been selected for examination. Once the status code is greater than 06, you cannot update to a status code lower than 07.	
	07	Transfer - When a record is transferred, and the current status code is less than 08, the status is unchanged. If the current status code is greater than 07, the status is overlaid with a 07, with the exception of status 08 in EGC 2050 in which case the status and EGC will remain unchanged even though the record was transferred from one Centralized files and Scheduling unit to another.

#### (8) Disposal Codes

These two digit codes are used to indicate the disposition of an examination. The codes are assigned by the Examination Division.

Disposal Codes 01 through 04 and 07 through 13, pertain to examined returns.

Disposal Codes 03, 04 and 07 through 13 are used when an adjustment is proposed/processed.

Disposal Codes 01 and 02 are used when no adjustments are proposed/processed to any type of return.

Disposal Codes 20 through 99 pertain to non-examined returns.

Disposal Codes 03, 04, 08, 09, 10, 12 and 13 are valid for partial assessments. The Disposal Codes on partial assessments do not post to Master File.

#### (a) Examined Disposal Codes

Code	Definition
01	No Change With Adjustments—(01 is considered agreed on the AIMS tables). Applies to no-change examined returns (even if a 30-day letter was issued) if there is an adjustment to the tax base data such as income or deduction items but no change in tax liability or refundable credits; or tax changes fell below the tolerance level in LEM IV. An audit report must accompany the case file. Note: An audit report is not required for most cases closed below the tax tolerance in the Campus TEFRA Function (CTF). An exception will be when the tax changes impact a prior or subsequent tax year (NOL, PAL, etc), or other adjustment years are above the tax tolerance. Item 41 is required if MFT = 30. The following are examples of no-change with adjustments examinations:
	a. Delinquent returns secured by the examiner, accepted as filed and forwarded to the campus for processing. This includes delinquent return pickups that result in a zero tax liability. If the TC 424 posted prior to the posting of the delinquent return, enter the balance due or refund amount, excluding penalties in Form 5344, Item 414. If an SFR has been processed the amounts from the secured return must be input through AIMS therefore DC 01 does not apply.  b. Claims disallowed in full. (Agreed or not agreed)
	c. Income tax examination when taxpayers are issued an examination report Form 4549 and Letter 1156. (see IRM 4.10)

<sup>@</sup> See IRM 4.4.1 - Exhibit 16 for a list of non-examined disposal codes.

<sup>+</sup> This blocking series will not generate a CP notice or control DLN: therefore the original return will remain filed under the DLN that contains the "X".

<sup>%</sup> Not valid if Return Requisition Indicator is Blank which means the paper return was requested.

Code	Definition
	d. Flow through entities where no changes are made to the entities reported income, loss, deductions or credits reflected on the return or the owner(s) K-1 and (1) a delinquent return secured by examination, or (2) a balance sheet item is adjusted, or (3) a related return is adjusted as a result of the flow through examination (i.e. – adjustments to basis, at risk, or passive activity rules, taxable loan repayments or distributions, or adjustments to include the amount reported to the owner's K-1).  e. Estate or gift tax cases when offsetting adjustments result in no change in tax liability. This includes
	gift tax cases when Letter 942 (C) is issued to taxpayers (See IRM 4.10).  f. Excise, trusts and estates, or employment tax cases when offsetting adjustments to tax base data
	and/or credits result in no change in tax liability.
	g. Disqualified 1120 DISC (obsoleted)/IC-DISC election.
	h. Non-TEFRA (nontaxable) Flow through Entities - no change with adjustments should be utilized when no changes are made to the entity's ordinary income or loss or separately stated items reflected on the return or Schedule K-1 and an owner's return is adjusted as a result of the flow through examination. This would include: adjustments to basis, at-risk or passive activity rules: taxable loan repayments; adjusting the owner's return to match the K-1 flow through amount(s).  i. TEFRA (nontaxable) Flow through Key Case Entities - Does not apply.
02	No change— (02 is considered no change on the AIMS tables) - Applies to Examination which do not
02	necessitate the issuance of a report (other than the no-change report subject to area director's approval)
	a. Taxable return — there were no adjustments or no changes in tax liability for this return to: Tax, penalties, or refundable credits. This disposal code would also apply to changes only affecting the balance sheet, including constructive dividend issues, and any other related return pick-ups where there was no tax liability adjustment to this return. Item 41 is required if MFT = 30. Block 405 & 408 of Form 5344 should be completed as appropriate.
	b. Flow through entities — no exam changes are made to the entities reported income, loss, deductions or credits reflected on the return or Schedule(s) K-1. (See DC 01 where adjustments are made to a related return.) Applies to TEFRA returns closed within 45 calendar days (including weekends and holidays) from the date the NBAP is issued to the TMP as well as those closed no change after 45 days where a no change FPAA is issued
	c. Non-TEFRA (nontaxable) Flow through Entities should be utilized when the examination results in no changes to the entity or any owner. This would also be appropriate if you make adjustments to one of the owner's returns as a result of compliance checks which are not related to the entity examination.
	d. Not valid with an Amount Claimed on the data base.
03	Agreed— (03 is considered agreed on the AIMS tables) – Applies only to returns if an agreement is received prior to the issuance of a 30-day or 60-day letter. EGC's 5XXX will not use DC 03 for agreements as their first contact with the TP is the 30-day letter. Also applies to claims allowed in full. EGC 2XXX: ALL agreed income tax cases closing from office examination will use Disposal Code 03 regardless of whether a Letter 915, Letter to Transmit Examination Report has been issued. EGC 5XXX: .Non-TEFRA (nontaxable) Flow through Entities: Applies to an agreed case if an agreement is obtained from all owners. If all signatures are received from the owners, you can close the case indicating on the entity report that agreement has been obtained from the owners. TEFRA (nontaxable) Flow through Key Case Entities: applies to an agreed case that will result in partner adjustments and an agreement is obtained from all partners, or an agreement from the partnership which binds all partners. If the net TEFRA partnership adjustments are zero, but the adjustments will result in taxable adjustments to the partners, close DC 03 with -\$1 entered in item 34 on the Form 5344. (If agreements are received as a result of a no change FPAA, close DC 02.)
04	Agreed— (04 is considered agreed on the AIMS tables) Applies only to returns if an agreement is received after the issuance of a 30-day or 60-day letter. EGC 2XXX, should use DC 03 - not DC 04. Non-TEFRA (nontaxable) Flow Through Entities: Applies to an agreed case if an agreement is obtained from all owners. If all signatures are received from the owners, you can close the case indicating on the entity report that agreement has been obtained from the owners. Claims partially displayed and agreed.
07	disallowed and agreed. <b>Appealed</b> — (07 is considered appealed on the AIMS tables) - Returns closed to Appeals before issuance of a 90-day letter, FPAA or FSAA. The Appeals Office Code (AOC) entered on Form 5344,
