Department of the Treasury
Internal Revenue Service
Document 6209 (Rev. 01-2013)
Cat No. 614620

USER INFORMATION - Document 6209 is provided as a handy reference guide only. More detailed and current information can be found in the appropriate Internal Revenue Manuals or IRMs which are available online through various links on the IRWeb homepage. They can also be downloaded from the Publishing web site by clicking on the Forms/Pubs/Docs button on the left of the IRWeb home page.

Providing Document 6209 in bound book format is the most economical format for our needs since the initial cost of changing from bound book to loose-leaf would be prohibitive. Additionally, the costs incurred in subsequent years would be greater than the cost of bound format. Document 6209 contains material of a sensitive nature and requires maximum safeguards. In addition, security dictates that copies of the Document 6209 carried by Revenue Officers and others should not come apart easily as potential loss would compromise “**Official Use Only**” material. Document 6209 can also be viewed online at the SERP website:

In an effort to provide users with a document of the highest accuracy and ease of usage, we are soliciting your help. If you are aware of any typographical errors or usage problems, please provide this information by clicking on the “**Feedback**” link at the bottom of the **SERP** home page. Include a description of the problem and the basis for the change or correction, provide the corrected information, and specify the section, page and paragraph of the document.

Note: This does not replace the standard means of reporting processing problems (i.e., 5391 or 5715).

2 Employee Disclosure Responsibilities

Employees may not access or disclose any tax return or information pertinent to a tax return related to their personal accounts, those of family, friends, or public figures. IRM 11.3, Disclosure of Official Information Handbook, states in part: Service employees may access returns and return information when there is a "need to know" the information for their tax administration duties. This is important in maintaining the confidentiality of information in the custody of the Service. Before disclosing returns or return information to other Service personnel, employees should satisfy themselves that the recipient has an official need for the information. A supervisor should be consulted if there is doubt that disclosures are proper.

UA Explanation**Code**

85 We are proposing to disallow the Fuel Tax Credit on your tax return. It appears you do not meet the requirements to claim the credit. This credit may not be allowed because:

- (1) No allowable business use of the fuel is evident on your return,
- (2) You claimed credit for diesel fuel or kerosene use on a farm for farming purposes,
- (3) Your credit appears to be excessive for the business activity reported on your return,
- (4) You claimed a credit as a gasoline wholesale distributor, or
- (5) As a registered ultimate vendor of diesel fuel or kerosene you did not provide the required documentation required with Form 4136, Credit for Federal Tax on Fuel.

If you believe you qualify for the fuel credit, please return a copy of this notice with the following: copies of invoices or receipts for the fuel purchases that show the Federal excise tax was paid, a list of vehicles and equipment used and the number of gallons, type of fuel used and the business use of each.

If you are claiming credit for sales as a registered ultimate vendor of diesel fuel or kerosene, you must provide:

- (1) The vendor registration (uv) number, and
- (2) The name and TIN of each farmer or government unit who bought diesel fuel or kerosene from you, and the number of gallons that you sold to each, and
- (3) A statement that you have:

Not included the amount of tax in the sales price nor collected the amount of tax from the buyer; or

Repaid the amount of tax to the ultimate purchaser of the fuel; or

Obtained the written consent from your buyer to take the credit.

If you are a seller of kerosene from a blocked pump, you must provide:

- (1) Your vendor registration (up) number, and
- (2) A statement that:

No tax has been imposed on the kerosene; and

You have not included tax in the sales price nor collected the tax from the buyer.

Please see Publication 378, Fuel Tax Credits and Refunds, for definitions and rules relating to the Federal Excise Tax.

86 The amount of First Time Homebuyer Credit claimed on page 2 of your 2009 tax return can not be allowed. Information on your return indicates the credit is being claimed for two homes acquired as a first time homebuyer.

87 The amount of Attributed New Motor Vehicle State/Local Sales/Excise Taxes claimed on Schedule L, Standard Deduction for Certain Filers on your tax return can not be allowed. This amount appears to be an excessive amount.

89 The amount being claimed on your tax return for Health Coverage Tax Credit is being examined. This amount has been frozen and will not be included in any anticipated refund amount. You will receive correspondence when the examination is completed and/or the remainder of the refund amount relating to this issue is released.

91 The tax on your return has been corrected because a deduction, credit or omission of income, or other entry on the return appears to be unreasonable or frivolous and cannot be allowed.

92 The loss on the sale of your residence or other property used for personal purposes is not deductible.

94 A non-resident alien may not deduct contributions, or casualty or theft losses on non-business property located within the United States, from income not effectively connected with a U.S. trade or business. (See Publication 519.)

95 Your expenses have been disallowed because you have not met the time requirements for taking these deductions.

99 This Unallowable is to be used only when specifically instructed to in IRM 3.12.3.

V We have computed your self-employment tax for you. The amount you reported s other income (\$400 or more) on line 21 of your tax return or as net taxable income on Schedule C, E or F, appears to be self-employment income. This income makes you liable for the self-employment tax under the law.

Please see Publication 533, Self-Employment Tax, for definitions and rules relating to self-employment tax.

Year	Wage Limitation	Employee Rate%	Employer Rate%	Total Rate%	Year	Self-Employment On Income From	Rate%
------	-----------------	----------------	----------------	-------------	------	--------------------------------	-------

When paying taxes on SE earnings, if the taxpayer is also employed and receiving wages, the SE tax is paid only if the wages do not meet or exceed the wage limitation. **Three scenarios to help understand, please follow the examples below:

Examples:

1) Tom works for ABC Company earning \$110,000 a year in wages (which exceeds the maximum for Social Security taxes.) ABC Company withholds Social Security and Medicare taxes from the wages they paid him. Tom also has self-employed earnings of \$20,000. Tom does not pay Social Security taxes on his SE earnings because his wages from ABC Company are over the maximum. However, Tom must pay the Medicare tax for all of his SE earnings.

2) Sam works for XYZ Company earning \$40,000 and the company withholds Social Security and Medicare taxes on his wages. Sam also has \$25,000 in SE earnings. Because Sam's wages and SE amounts don't exceed the maximum, he must pay both Social Security and Medicare taxes on his SE earnings of \$25,000.

3) Joe works for MNO Company and earns \$75,000. MNO Company withholds Social Security and Medicare taxes on his wages. Joe also has \$50,000 in SE earnings. Because Joe's wages and SE amounts exceed the maximum, he will pay Social Security tax on the amount of his SE earnings up to the maximum for the year in question. Joe will pay Medicare tax on the entire SE earnings because there is no maximum for Medicare.

Section 4 - Document Locator Number

1 Nature of Changes

Description	Page No.
IRM references Updated	4-2
Updated campus location codes	4-3
IDRS Campus and File location Codes	4-9
Updated Adjustment blocking series	4-21

2 DLN Composition

- (1) The document locator number (DLN) is a controlled number assigned to every return or document input through the ADP system. The fourteenth (last) digit is the year of processing and is assigned by the Campus computer at the time of the original input.
- (2) The DLN is used to control, identify, and locate documents processed in the ADP system.
- (3) The DLN should not be confused with the Taxpayer Identification Number (TIN), which consists of nine digits, for example: **(Xs identify a numeric field in the following example)**
 - o Social Security Number XXX-XX-XXXX (IMF)
 - o IRS Individual Taxpayer Identification Number 9XX-(70-88)-XXXX (IMF)
 - o Employer Identification Number XX-XXXXXXXX (BMF, EPMF)
 - o IRS Adoption Taxpayer Identification Number 9XX-93-XXXX (IMF)

Note: A temporary SSN is sometimes assigned by the Campus. The first three digits (900-999) indicate the number is temporary. The 4th and 5th digits are the code of the Campus assigning the number. The last four digits are numbers assigned consecutively beginning with 0001. The printed format is TXXXXXXXX* (The "T" Indicates a temporary SSN, and the asterisk (*) indicates the number is invalid.)

- (4) Returns and documents are blocked and filed by DLN.
- (5) The format for a DLN is as follows:

28	2	10	105	600	25	4
FLC	Tax Class	Doc Code	Julian Date	Block Series	Serial #	List Yr

- (a) The first two digits of the DLN represent the File Location Code (or Campus Code). Generally, the primary FLC codes are used in the DLN; however, during heavy filing periods, overflow File Location Codes will be used to handle overflow conditions and will not correspond to the actual filing location. For Payer Master File (PMF) W3 Payer DLNs, the first two digits will be the first two positions of the Payer TIN (if non-numeric, a value of 69 is assigned).
- (b) The third digit is the tax class. This identifies the type of tax each transaction involves.

Code	Definition	Code	Definition
0	Employee Plans Master file (EPMF), EO and EP Determination	5	Information Return Processing (IRP), Estate and Gift Tax
1	Withholding and Social Security	6	NMF
2	Individual Income Tax, Fiduciary Income Tax, Partnership return	7	CT-1
3	Corporate Income Tax, 990T,8038 Series,	8	FUTA

Any line marked with # is for official use only

Code Definition
 8609, 8610
 4 Excise Tax

Code Definition
 9 Mixed - Segregation by tax class not required.

- (c) The fourth and fifth digits are the document codes. These are shown in this book in Section 2 by form number. Certain document codes can be applicable to more than one type form or tax class. The most frequently encountered are:

Code Definition
 07 EP Determination Application
 17 Subsequent payment input by the Campus
 18 Subsequent payment input by the Area Office
 47 Examination Adjustment
 51 Prompt/Manual/Quick Assessment

Code Definition
 52 Account Transfer In
 53 EO Determination Application
 54 DP Adjustment
 63 Entity changes
 77 Form 3177

- (d) The sixth, seventh and eighth digits represent the control (Julian) date. This date could be the deposit date of remittance received with a return or payment documents. A Sunday date when numbering NR returns that week, a transfer date-transfer of credits, or the current date when not otherwise specified. The control date for IDRS, Remittance Processing System (RPS), and Lockbox input transactions is incremented by 400 to avoid duplicate DLNs. Subtract 400 to determine control date.

NOTE: The Julian Date does not always correspond with the Received Date or Processing Date.

- (e) The ninth, tenth and eleventh digits represents the Blocking Series. Complete information can be found in IRM 3.10.73 for Non-remittance Documents. Revenue Receipt documents are 000-999 Blocking Series, except for Extensions. See section 4.13 for Adjustment Blocking Series. For Payer Master File (PMF) W3 Payer DLNs, the ninth through thirteenth digits are used as a single five position sequence number ranging from 00000 through 99999 within unique FLC, Doc. Code (37, 38) and Julian day.
 (f) The twelfth and thirteenth digits are the serial numbers. The maximum number of records within a block is 100 and they are serially numbered from 00 thru 99.
 (g) The fourteenth digit is the last year digit of the year the DLN was assigned. This digit is computer generated.
 (h) The original DLN of the return is associated with Transaction Code 150. If there has been an Examination/Adjustment which created a refile DLN, a letter X following the DLN will denote that the return is now filed under the refile DLN.

Notes:

Normal Julian Date is equal to 001 through 366. Inflated Julian Date is equal to 401 through 766.

MeF IMF - Inflated Julian Dates are used for all MeF IMF DLNs to avoid duplicating DLNs with Legacy ELF.

MeF BMF (Domestic FLCs Only): When all DLNs have been exhausted for the normal Julian Date under FLCs 93, 92 and 88, the following MeF BMF Forms and Schedules can overflow to Inflated Julian Dates and continue assigning DLNs using FLCs 93, 92 and 88 with the Inflated Julian Date - Form 7004, MeF Sch K-1 (Form 1065), MeF Sch K-1 (Form 1065B) and MeF Sch K-1 (Form 1120S). This does not apply to Foreign FLC 60 or US Possession FLC 78.

Effective January 1, 2010, the U.S. Department of Labor's Pension and Welfare Benefits Administration (PWBA) began processing 5500 series filings electronically using the ERISA Filing Acceptance System (EFAST2) using FLC 92 & 93. From July 2000 to January 2010, the following File Location Codes identify filings processed by EFAST: 56, 62, 72, 84, 86, and 91.

5 Individual Master File (IMF) Electronically Filed Returns General

A. Electronic Returns

- (1) Electronic returns can be identified by the unique Document Locator Number (DLN) assigned to each Campus as follows (the number in parentheses will be used when the maximum is reached for that processing day):

Campus	DLN
Andover Campus Note: ANSC is no longer a processing site, but the FLCs are still used for IMF electronic returns.	16(14)
Austin Campus	76(75)
Austin (U.S. Possessions)	21
Austin (International)	20
Fresno Campus	80 (90)
Kansas City Campus	70(79)
Philadelphia Campus Note: PSC is no longer a processing site, but the FLCs are still used for IMF electronic returns	30(32)
Tennessee Computing Center	72(64)

Example: DLN 16211-110-036XX-4 would indicate an electronic return was filed at the Andover Campus. Document Code 21 will be used before going to the second FLC for the Form 1040. Blocking Series for document Code 21 has been expanded to 000 through 999, document code 11 has been expanded to 000 through 919 and 930 through 999.

- (2) When an electronic return is printed, it is the original return unless it is stamped photocopy.
- (3) An electronic return can be displayed in two different formats using two different prints. The graphic print is in the official 1040 format. The GEL print displays all the data contained on the electronic return, but is not in the official Form 1040 format. Both types of original returns are charged out to the requester and will remain so until it is renumbered or refiled. **DO NOT DESTROY ORIGINAL ELECTRONIC RETURNS. NOTE:** A photocopy of the return is not charged out.
- (4) IMF electronic return prints can be identified by the words "ELECTRONIC RETURN-DO NOT PROCESS" in the bottom margin of a graphics print and in the top margin of a GEL print. If a correction was made to the return, the word "shadow" will appear at the top right corner of the printed return.

B. Form 8453, U.S. Individual Income Tax Declaration for an IRS e-file Return

- (1) Form 8453 is the signature document for an electronically filed Form 1040/A/EZ return. It also serves as a transmittal for required attachments, (i.e. Form 3115, Form 8332, etc.). Form W-2, Form W-2G and Form 1099-R are not required to be submitted with Form 8453. If the IRS does not receive a signed Form 8453, or taxpayer's electronic signature(s), the return is not considered filed and the taxpayer could face a failure to file penalty. Taxpayers should not file Form 8453 if they signed their electronic return using a Personal Identification Number (PIN) signature method. The Electronic Return Originator (ERO) sends the completed Form 8453 and required attachments to the appropriate Campus.
- (2) Form 8453/8453-OL and the electronic return will not have the same DLN.
- (3) Forms 8453/8453-OL are processed using a Form 8453 DLN. The two digit File Location Code (FLC) will be the same as that for the Campus paper documents. The tax class will be "2" and the document code will be "59".

(4) Forms 8453/8453-OL can be identified as follows:

Tax Class / DOC Code	Blocking Series	Processing Center	Form
259	000-949	ANSPC, AUSPC, CSPC, KCSPC, MSPC, OSPC, PSPC	1040

C. Form 8453-OL, U.S. Individual Income Tax Declaration for On-Line Filing

- (1) Form 8453-OL is the signature document for an electronically filed Form 1040/A/EZ return filed through the Online Filing Program, and also serves as a transmittal for required attachments, (i.e. Form 3115, Form 8332, etc.). Form W-2, Form W-2G and Form 1099-R are not required to be submitted with Form 8453-OL. The Form 8453-OL authorizes direct deposits of refunds, direct debits of payments and identifies what information the Service is permitted to disclose to the on-line filing company (internet service provider or transmitter). If the IRS does not receive a signed Form 8453-OL, or taxpayer's electronic signature(s), the return is not considered filed and the taxpayer can face a failure to file penalty. Taxpayers should not file Form 8453-OL if they signed their electronic return using a Personal Identification Number (PIN) signature method.
- (2) The taxpayer will use tax preparation software bought off-the-shelf to create an electronic income tax return using a personal computer with a modem. Online returns will be transmitted to IRS through the online filing company. The online filing company will transmit all on-line returns from taxpayers to the appropriate Campus within 24 hours; retrieve the taxpayer acknowledgment and provide the acceptance and rejection notification to the taxpayer. Online filing companies will translate IRS reject codes into language easy for taxpayers to understand and provide assistance in the correction process as a service to their clients. The taxpayer is instructed to send the completed Form 8453-OL and required attachments to the appropriate Campus.

D. Requesting Electronically Filed IMF Returns and Forms 8453/8453-OL

- (1) Electronically filed returns can be requested by using IDRS Command Codes (CCs) ELFRQ or ESTAB.
- (2) CC ELFRQ can be accessed only by the Campus that processed the electronic return and the Form 8453 or 8453-OL, or by Campuses that are linked with an IDRS line to the Campus that processed them.
- (3) The Electronic Filing Unit is required to fill print requests in the same priority order that is outlined in Files IRM 3.5.61 and Electronic Filing IRM 3.42.5 as follows:
 - (a) Special expedite requests (Appeals, court cases, TAS, congressional, etc.)
 - (b) Statistics of Income (SOI)
 - (c) Examination cases that are "L" coded
 - (d) Error resolution (ERS) rejects
 - (e) Unpostables
 - (f) Criminal Investigation
 - (g) Output review
 - (h) Examination requests on Form 5546
 - (i) Internal notices (CP-36, CP-55)
 - (j) All other requests (oldest date first)
- (4) Some requesters may not require the original electronic return but need a photocopy instead. If this is the case, annotate the Remarks area of the request "photocopy requested".
- (5) When a request for both the electronic return and the Form 8453 is received in the Electronic Filing Unit, the requester will not automatically receive Form 8453. The return will be sent from the EFU and Form 8453 will be sent from Files after it's been pulled.
- (6) If Form 8453 is required, it can be requested by:
 - (a) Forms 8453 for TY2003 and subsequent years can be requested by using IDRS CC ESTAB; using the 8453 DLN available on CC TRDBV.
 - (b) Entering IDRS CC ELFRQ with Action Code 2, or
 - (c) Notating "Please pull 8453" in the remarks section of IDRS CC ESTAB.

E. Refilling Electronic Returns

- (1) When the requester no longer needs the original electronic return (a hardcopy print is an original return unless stamped "PHOTOCOPY") it will be returned to the Electronic Filing Unit. NOTE: Photocopies of electronic returns/GEL prints should not be returned to EFU. They can be destroyed.
- (2) When the original return is sent back to the Electronic Filing Unit, they will:
 - (a) Refile the return on the LAN system.
 - (b) Separate the hardcopy return from the Form 8453 and/or other attachments.
 - (c) Route Form 8453 to the Files Unit.
 - (d) Dispose of the hardcopy Form 1040 as classified waste.
- (3) If an adjustment is made to the original return and the requester has used the return as a source document, it will have a renumbered DLN. A renumbered DLN can be identified by a Document Code 47 or 54 and one of the following blocking series:

000-049	290-309	540-589	630-698	800-809	920	950-999
180-198	500-519	600-619	700-799	900-909	930-939	
- (4) If information on the original return is needed in the future, request the controlling DLN found on IDRS.
- (5) When an adjustment is made to an electronic return without the original document, and the IRM instructs the adjustment document to be associated with the return, the tax examiner will use the appropriate refile blocking series. A CP-55 will be generated and forwarded to the EFU.

6 1040 Online Filing Program

A. General

Filing from home using a personal computer is a method for taxpayers to prepare and send their Form 1040 tax return to the IRS. Anyone who has a computer, modem and approved IRS tax preparation software available a local computer retailers or through various online filing companies' Internet websites may transmit their tax return to the IRS via an online filing company (internet service provider or transmitter). There is no charge made by the IRS. However, online filing companies (internet service providers or transmitters) offering this service to taxpayers may charge a fee for transmission. In order to prevent potential fraud from the home filer in the 1040 Online Filing Program, Department of Treasury requires that an online company must not allow any more than five returns be filed from one software package or e-mail address. As stated in the Publication 1345, software developers are required to ensure that no more than five accepted returns are sent to the IRS. See Revenue Procedure 98-51 and Publication 1345.

The online filing program uses commercial, state of the art user-friendly software and accepts all individual returns and schedules that are available using IRS e-file. It provides taxpayers with an IRS acknowledgement, improved return accuracy, direct deposit of refunds, early filing with tax payment deferred until April 15th, and ability to file state returns.

For Filing Season 2009, the Self-Select PIN will be the only IRS e-file signature method available to taxpayers filing online. The Form 8453-OL U.S. Individual Income Tax Declaration for an IRS Online e-file Return and Form 8453-OL(SP) U.S. Individual Income Tax Declaration for an IRS Online e-file Return (Spanish Version) will be eliminated as signature documents for individual taxpayers that use tax preparation software. This policy change is designed to promote a paperless and secure method of signing individual returns electronically.

B. Form 8633 procedures for Online Filing (OLF) Applicants:

(Applicants must register for e-Services before initiating an IRS *e-file* Application. It is recommended that all new or revised *e-file* Applications be completed using the IRS *e-file* Application. Until mandated Form 8633, Application to Participate in IRS e-file Program can be accepted. Form 8633 should be mailed to the IRS Andover Submission Procession Center..

1. Applicants interested in participating in Online Filing must select Online Provider from the Provider Options drop-down menu on the "Programs Applying For" page of the application or select the "Yes" check box located on line 2d of Form 8633, paper version.

2. If the applicant has not participated in the 1040 OLF Program previously, the Form 8633 should be marked as a new e-file Application. If the applicant has previously participated in the OLF Program and made changes since its last e-file Application, the form will be marked as a revised e-file Application.
3. Applicants should submit the electronic application or complete and mail the Form 8633 to Andover Submission Processing Campus (ANSPC). Required supporting documentation should be included with each application.
4. ANSPC will follow normal Form 8633 review procedures (e.g., checking for signatures, completeness). Each application will be entered on the Third Party Data Store (TPDS) and will be assigned a unique OLF electronic filer identification number (EFIN).
5. OLF companies (new and current) will receive a "unique" EFIN for OLF. A unique EFIN will be generated that begins with the following location codes: "10" ANSPC, "21" AUSPC, "32" CSPC, "44" OSPC and "53" MSPC.

7 Modernized e-File

A. Filing Individual Income Tax Returns through an Authorized e-file Provider

Businesses authorized by the IRS to participate in the IRS e-file Program are known as Authorized IRS e-file Providers. Some taxpayers prefer the convenience of filing their individual income tax return through an Authorized e-file Provider and gain e-file benefits such as improved return accuracy, quicker processing time and quicker refunds. These taxpayers also have the options of electronically signing their tax return using one of the methods described below.

B. Electronic Signature Methods

There are two methods of signing individual income tax returns electronically through the use of a Personal Identification Number (PIN). Taxpayers may self-select a PIN and use it to sign the return. Taxpayers may also authorize EROs to enter their PIN in the electronic record. The two electronic signature methods available for taxpayers to sign their tax return is the Self-Select PIN method and the Practitioner PIN method.

In general, most taxpayers who file Form 1040, 1040A, 1040EZ in the prior tax year may use a self-selected PIN to sign their return.

Note: If the taxpayer agrees, it is acceptable for an ERO and/or software program to generate or assign the taxpayer PIN for individual income tax returns and documents. The taxpayer consents to the ERO's choice by completing and signing an IRS e-file signature authorization containing the intended taxpayer PIN. The taxpayer's PIN can be systemically generated or manually assigned into the electronic format and/or signature authorization form. However, the ERO must receive the signature authorization signed by the taxpayer(s) before they transmit the return or release it for transmission to the IRS. This guidance refers to the return filed using the Self-Select PIN or Practitioner PIN method.

C. Self-Select PIN Method

The Self-Select PIN method allows taxpayers to electronically sign their e-file returns by entering a five digit PIN. The five-digit PIN can be any five numbers except all zeros. The Self-Select PIN Method requires taxpayers to provide their Prior Year Adjusted Gross Income (AGI) amount or Prior Year PIN for use by the IRS to authenticate the taxpayers. For Filing Season 2011, the Internal Revenue Service will implement a web-based application called, "Electronic Filing PIN Help". This application will provide taxpayers with a PIN to be used when they cannot locate their Prior Year AGI or Prior Year PIN. The original Adjusted Gross Income is the amount from the originally accepted return, NOT the amount from an amended return, a corrected amount from a math error notice, or a changed amount from IRS.

Taxpayers who authorize the ERO to enter their self-select PIN into the electronic record on their behalf must complete a Form 8879, *IRS e-file Signature Authorization* or Form 8878, *IRS e-file Signature authorization for Application for Extension of Time to File*.

D. Practitioner PIN Method

The Practitioner PIN method is an additional electronic signature option for taxpayers who use an Authorized IRS e-file Provider (ERO) to e-file. This method also requires the taxpayer to sign their return using a five digit PIN. The taxpayers eligible to use the Self-Select PIN method are also eligible to use the Practitioner PIN method. However, this method does not require the entry of the taxpayer's Date of Birth and Prior Year original Adjusted Gross Income, and there is no age requirement. The ERO must complete Form 8879, including Part III, for each return that is prepared using the Practitioner PIN method. The ERO must complete Form 8878, including Part III, for each Form 4868 extension request that is prepared using the Practitioner PIN method.

An Authentication Record must be present when the Practitioner PIN, Self-Select by Practitioner or, Online Self-Select PIN is used.

E. Refund Anticipation Loan (RAL) Code

The IRS removed the Debt Indicator for the 2011 Tax Filing Season. Beginning with the 2011 tax filing season we will no longer provide tax preparers and associated financial institutions with the "debt indicator," which is used to facilitate refund anticipation loans (RALs). Taxpayers will continue to have access to information about their tax refunds and any offsets through the "Where's My Refund?" service on IRS.gov.

8 EFTPS

Reference IRM 2.3 Chapter 70 - Command Code EFTPS

The Electronic Federal Tax Payment System (EFTPS) is a system designed to utilize Electronic Funds Transfer (EFT) to pay all federal taxes.

Use Command Code EFTPS to research payments on the EFTPS database. Reference IRM 2.3 Chapter 70. Depending on the information available, Command Code EFTPS may be used with any of three definers:

E - Research a specific EFT number

R - Research a specific Reference Number (not valid for bulk filers)

T - Research a specific TIN, payment date and amount

A. EFTPS DLN

Master File Processing of an EFTPS transaction is the same as other payment processes. The DLN is a unique number assigned by the EFTPS and configured as follows:

81	2	19	161	600	25	2
FLC	Tax Class	Doc Code	Julian Date	Block Number	Serial Number	List Year

1. The first two digits are the File Location Code (FLC). FLC 71 was used in 1996. From January 1, 1997 to June 30, 2005, FLC 72 was used for electronic payments processed and worked in ECC-Memphis. On and after July 1, 2005 the FLC was and still is 81 for electronic payments processed in ECC-Memphis but worked in Ogden. As of September 2012, 81 is the primary FLC with 82 and 83 as overflow FLC's. Please refer to the chart after #4, below.

2. The third digit is the Tax Class. This identifies the type of tax each transaction involves.

1	Withholding and Social Security	4	Excise Tax	7	CT-1
2	Individual Income Tax	5	Estate and Gift Tax	8	FUTA
3	Corporate Income Tax				

- The 4th and 5th digits represents the Document Code - All EFTPS payments will be processed as a Revenue Receipt (Doc Code 19).
- The 6th, 7th, and 8th digits are the Julian Date – Settlement Date. In EFTPS, this is the day money moves to Treasury's account.

A. EFTPS DLN

Master File Processing of an EFTPS transaction is the same as other payment processes. The DLN is a non-

unique number assigned by the EFTPS and configured as follows:

1. The first two digits is the File Location Code (FLC). On and after July 01, 2005, FLC 81 for electronic payments processed in ECC-Memphis, but worked in Ogden; From January 1, 1997 - June 30, 2005, FLC 72 for electronic payments processed and worked in ECC-Memphis; FLC 71 was used in 1996.
2. The third digit is the Tax Class. This identifies the type of tax each transaction involves.

- | | | |
|-----------------------------------|-----------------------|--------|
| 1 Withholding and Social Security | 4 Excise Tax | 7 CT-1 |
| 2 Individual Income Tax | 5 Estate and Gift Tax | 8 FUTA |
| 3 Corporate Income Tax | | |

3. The 4th and 5th digits represents the Document Code - All EFTPS payments will be processed as a Revenue Receipt (Doc Code 19).
4. The 6th, 7th and 8th digits are the Julian Date — Settlement Date. In EFTPS, this is the day money moves to Treasury's account.
5. The 9th through 11th digits are the Block Numbers, non-unique.
6. The 12th and 13th digits represent the Serial Number — assigned sequentially, then repeated.
7. The 14th digit is the last digit of the year the DLN is assigned.

B. Electronic Funds Transfer (EFT) Number

Each payment transaction is assigned a 15-digit Electronic Funds Transfer (EFT) number by the Treasury Financial Agent (TFA). The EFT number is used as the unique identifier and to research payments on Master File and IDRS. DO NOT use the EFTPS DLN to perform research on EFTPS transactions as these are not unique numbers and can be duplicated.

The EFT number is configured as follows:

2 Leading Digits	15 Digit EFT Number						
29	2	2	3	3	137	01	123456
FLC only appears on IDRS & MF	Financial Agent Number	Payment Method	Input Method or CPI	Year Digit	Julian Date	Source Code	Serial Number

The TEP assigns two additional leading digits to denote the Filing Location Code (FLC) for the processing Campus (**29**, 81, 82 and 83 for Ogden; 49 for Memphis) to make an EFT number appear as 17 positions on Master File (MF) and IDRS. However, these digits are not used for payment research with command code EFTPS.

The first digit is the Financial Agent Number (1 = Bank One*, **2 = Bank of America**, 3 = Treasury Offset Program, 4 = SSA Levy, 5 = RS-PCC, 6 = Reserved).

The second digit identifies the Payment Method as follows: (0 = IRS E-file (Direct Debit), 1 = ACH Credit, **2 = ACH Debit**, 3 = Federal Tax Application (Same-Day Wire), 4 = (Reserved), 5 = Levy, 6 = Credit Card, 7 = Online, 8 = Railroad Retirement Board (RRB) Link*, 9 = Government Payment (EFTPS for Federal Agencies (formerly FEDTAXII) Federal Payment Levy Program, or SSA Levy).

The third digit is the Input Method or Combined Payment Indicator (CPI) (**0 - 9**). The various values and meanings are dependent on the value of the Payment Method. See table in IRM 3.17.277.5.3.

The fourth represent the last digit of the year (**3 = 2013**).

The fifth, sixth and seventh digits represent the Julian Date 001-366. The Julian Date of **137** represents May 16, 2013. If an overflow condition exists, 401-766 may be used. This is the date the EFT number was assigned.

The eighth and ninth digits represent the Source Code. This is the Bulk Provider Number, RS-PCC Originating Location, or a semi-random number depending on the Payment Method. See IRM 3.17.277.5.3.

The eighth or tenth through fifteenth digits represent the Serial Number which is a sequentially assigned unique number.

* Historical purposes only, Bank One is no longer a Financial Agent as of 2004; Railroad Retirement Board (RRB) Link was decommissioned in 2008.

9 Master File and Non-Master File Tax Account Codes

Master File Tax Account Codes (MFT Codes) are required in each transaction to identify the specific module to which a transaction is to be posted. They are listed below with their corresponding tax class and document code.

10 Reduce Unnecessary Filers (RUF) Program DLN

The Reduce Unnecessary Filers (RUF) program has been assigned two unique DLNs and two Master File filing requirements (MFR):

- Pension withholding RUF only filers assigned DLN is 28263999000YYZ and MFR 17 - where "999" equal to Pension RUF, "YY" is the tax return year and "Z" is the year digit of the processing year
- Regular RUF filers assigned DLN is 28263998000967 and MFR 16 where "998" equal to Regular RUF, "YY" is the tax return year and "Z" is the year digit of the processing year.

11 Master File Endorsement Data

Forms 1040 received in the Campuses with remittances that fully pay the tax liability are not processed until the refund returns are processed. If it is necessary to request a fully paid Form 1040 prior to completion of processing, check

endorsement data found on the back of the check should be entered on Form 2275. The endorsement data, such as the deposit date, tax class code, document code, sequence number, and machine number, along with the amount of the check should be entered in block 9 of Form 2275 (Rev. 4-72), or on Form 4251 (Return Chargeout-IDRS). Sometimes the endorsement is quite difficult to read from the back of the check. However, it is the only way full paid returns can be secured prior to the processing completion date.

This endorsement data is also used to locate missing payments for payment tracing cases.

Note: Deposit Sequence Number is encoded on the front of the check.

12 IDRS Sequence Number

As payments are posted directly and correctly to the IDRS system with command code PAYMT, a 13-digit remittance sequence number is generated. The sequence number is stamped on the front of the remittance relating to the posted payment and posting vouchers.

The sequence number is established as follows:

- Julian date—3 digits—from input date
- District Office—2 digits—generated from IDRS terminal
- Area Office—2 digits—generated from terminal
- Terminal Number—2 digits—generated from terminal
- Operator Number—1 digit—last digit of employees number generated from entry code
- Sequence number—3 digits—existing sequence number

Note: The transaction DLN can be determined from this sequence number.

13 Residual Remittance Processing System (RRPS)

A Residual Remittance processing System (RRPS) is in place at all Campuses. The RRPS system is Y2K compliant, using Micron OE/KV terminals equipped with NT Windows software. The system processes paper vouchers and electronic vouchers and the remittances accompanying the vouchers. The vouchers and remittances are processed on a NDP 500 transport system from Unisys. The system processes IMF, BMF, NMF, multiples, splits, and user fees transactions.

The NDP500 transport system requires two passes to complete processing each batch of work. The paper vouchers and remittances will be processed on the transport i Pass 1, an RPSID Number will be printed on the back upper left corner on the voucher and the remittance. The RPSID Number contains the batch number, sequence number and the date processed. All correction data is sent to an image correction operator who makes the necessary changes for the transaction to be perfected and ready for balancing the batch. The remittances only, (checks, money orders, etc.) are then processed through Pass 2 on the NDP transport system. In Pass 2 the remittance amount is encoded at the bottom right front of the remittance, the IRS audit trail is printed on the back of the remittance to the right of the RPSID Number. The audit trail consists of up to 56 numeric/alpha and special characters. The audit trail contains the following fields:

4 digits	Alpha - Name Control or Check Digits
14 digits	Numeric - DLN
3 digits	Numeric - Transaction Code
2 digits	Numeric - MFT Code
9 digits	Numeric - TIN
6 digits	Numeric - Tax Period
1 digit	Alpha - Split/Multiple Remittance Indicator (S/M)
8 digits	Numeric - Transaction Date (TD)
9 digits	Numeric/Special Characters Accounting supplied information

The system also stamps the U.S. Treasury endorsement on the back side of the remittance. The endorsement stamp contains the following information:

Name of Financial Institution; City and State Location of Bank; IRS Campus Account Identification Number; DIR, IRS

Any line marked with # is for official use only

Center; City and State Location of Campus; For Credit to the U.S. Treasury; Financial Institution American Banking Association Number (ABA)

The RRPS is an imaging system which archives the front of the vouchers and the front and back of the remittances (i.e.; checks, money orders, etc.). Using an image display terminal(s) you can access the archive system to view or print a copy of an electronic or paper voucher, or a remittance. The image of the voucher and remittance can be accessed by using the taxpayer's Name, SSN, DLN or RPSID Number, to bring the image up on the display terminal(s).

13 Adjustment Blocking Series

Campus processing of taxpayer accounts for adjustment purposes must use the following blocking series to indicate the nature of the adjustment. The return must be associated with the subsequently generated IDRS transaction record unless the blocking series is specified as non-refile DLN. A complete list of blocking series, including other than adjustments, can be found in IRM 3.10.73.

14 How to Identify the DLN of the Return

The ideal source for determining the DLN of the return is an up-to-date transcript of the account. However, you can usually rely on the DLN printed on a computer generated notice if it is no more than two or three weeks old.

When analyzing a transcript use the transaction codes, the "X" indicator denoting refile DLNs, and the document code and blocking series to decide where the original return is filed. Transaction Codes 150, 29X, 30X and 421 with 6XX blocking series, are the only codes involving returns. An "X" shown on the transcript to the far right of the DLN indicates that DLN is the refile DLN (or Control DLN) and the original return will ordinarily be found attached to that document. If an account has several DLNs with an "X" indicator, the last one on the transcript will be the refile DLN. If the DLN on a retention register has a "D" indicator then the return has been destroyed.

There are some instances where you also need to look at the document code and blocking series of the DLN to determine whether or not the original return is attached. Document Code 47 identifies an Examination adjustment and is used for TC 30X. Document Code 54 identifies a data processing adjustment and is used for TC 29X; and Document Code 51 identifies transactions transferred into the Master File (for example, prompt or quick assessments).

The following chart can serve as a guideline to help determine which refile DLNs will have original returns attached. Note: If the return cannot be located under a current refile DLN, research a Master File transcript or IDRS for a possible prior refile DLN. Request the return again using the prior refile DLN.

15 Forms 2275, 4251 and 5546

Form 2275 is a two-part manually prepared document used for requesting returns. This document should only be used in emergency situations.

Form 4251 is a two-part computer-printed charge-out document which results from the input of a document request into the Integrated Data Retrieval System (IDRS).

Forms 5546, Examination Return Charge-out serves the same purpose as Form 4251.

16 Priorities

When a request is prepared, the requester must indicate if a photocopy is needed, otherwise the original return will be furnished.

The following is a priority list to be used by the files area for pulling returns. Deviation from the list can be made, at the discretion of files management.

- (1) Special EXPEDITE Requests (examples: court cases, TAS, Criminal Investigation).
- (2) Daily requests for returns and documents not yet processed to good tape (examples: Error Correction, Rejects)
- (3) Daily requests for the Questionable Refund Detection Team
- (4) Weekly (cyclic) requests
 - Statistics of Income
 - Refund and Notice Review
 - Unpostables
 - AIMS
 - Internal Notices
- (5) Other requests.

When a right-hand bracket "]" is entered in the first position of this field, it indicates that the TIN was entered in the immediately preceding CC ACTON, ENMOD, REINF, SUMRY or TXMOD, and that TIN will be displayed back to the screen. If the request requires research, that TIN will be used. It will also be printed on the Form 4251. Any line marked with # is for official use only

Item	Line	Description
8	2	MFT- must be entered and must be in "nn" format. Whenever the MFT is "52", then the Form Number must be entered as either "706" or "706NA", and the Tax Period must be "000000". See IRM 2.3.17.7, Command Code ESTAB—Error Messages, and see IRM 2.3.17, 8, Command Code ESTAB—Consistency Messages.
9	2	FORM NUMBER- If entered, use the Form Number of the document being requested. For requests that require Master File research, it must be a tax return that is processed to the Master File. When the Form Number is either "706" or "706NA", then the MFT must be "52", and the Tax Period must be "000000".
10	3	TAX PERIOD- Must be in the format "nnnnnn", and the fifth and sixth digits must be "01" – "12". The only exception to this guideline is when the Tax Period equals "000000". See IRM 2.3.17.7, Command Code ESTAB—Error Messages, and see IRM 2.3.17,8, Command Code ESTAB—Consistency Messages.

Following the stop number, the two-character State-Code of the requestor should be entered. The state abbreviation should be the last entry on that line. For example: FSC STOP 1234 CA. If an entry is made here items 14, 15, 16, 17 and 18 must be blank.
14	5	STATE CODE- if entered, item 13 (SC Stop) must be blank. ST-CD is the two-character State Code of the requestor address after entering the requestor's State Code and entering BOD/AREA-NUM (Line 10, Item 20) depress Enter/XMIT on your keyboard. 16	6	REQUESTOR ADDRESS LINE 1- if item 14 (SC CODE) was used to obtain the requestor's address, the Street address will appear on line 6.
17	6	REQUESTOR STREET ADDRESS STOP- Put Street Address Stop here. If Street Address Stop is saved from previous ESTABD request, it will be pre-filled when the ESTABD input screen appears.
18	7	REQUESTOR ADDRESS LINE 2- if item 14 (SC CODE) was used to obtain the requestor's address, the City, State and Zip Code will appear on line 7.
19-20	8-9	REMARK LINES- These lines should be used to provide additional information to the individual searching for your requested information. Whatever is input in these fields will print on the Form 4251 in the same format as it was input. Exceptions: Special Characters such as "?", "!", ",", and "=" will print as a blank space. Note: ESTABD does not support Universal Access.

C. Request Codes

Code	Purpose
B	Causes the words "ENTIRE BLOCK" to print below the DLN and causes the serial number of the DLN to be suppressed. It requests the files charge-out and forwards a complete block of documents. Request Code B is authorized by current IRM Handbook procedures to request blocks of original documents. For further information, refer to IRM 3.5.61, Files Management and Services.
C	This request code causes the words "COPY ALL" to print below the DLN on Form 4252. It requests a copy

of all of a return or other document.

E		#
F	This request code causes the word "FOLLOWUP" to print below the DLN on the Form 4251. Use it when requesting an original document that you have already requested once, if you have not received any reply to your first request.	
G	This request code causes the words "GAO FINANCIAL AUDIT" to print below the DLN on the Form 4251.	
I	This request code causes the word "INFORMATION" to print below the DLN on the Form 4251. It requests the files to provide information from a return or other document. The information needed should be specified in the Narrative portion of CC ESTAB.	
K	This request code causes the words "COPY-SEE NOTE" to print below the DLN on Form 4251. It requests that only a specified part or parts of a return be copied. The parts needed should be specified in the Narrative portion of CC ESTAB.	
MUV	These request codes are reserved for specified use by management. Do not use them unless so directed.	
O	This request code requests an original document. The word "ORIGINAL" is printed before the DLN on the Form 4251. Request Code O may be input for a request for tax returns only, unless the requestor is authorized to receive the originals of documents other than tax returns. Refer to IRM 3.5.61, Files Management and Services. With this exception, use request codes C, K, P or I for documents other than tax returns.	
P	This request code causes the words "COPY-PAGE 1" to print below the DLN on Form 4251. It requests a copy of the first page only of a return or other document.	
R	This request code is used for reimbursable photocopy requests received from taxpayers. The words "REIMBURSABLE COPY" are printed below the DLN on the Form 4251.	
S	This request code is used for requesting the scanning of paper documents into CIS. The words "COR. IMAGING SYSTEM" are printed below the DLN on the Form 4251.	
T	This request code is used to recharge documents. The word "RECHARGE" is printed below the DLN on Form 4251.	
W	This request code indicates a request only for a W-2. The words "W-2 ONLY REQUEST" are printed below the DLN on Form 4251.	
X	This request code is used to request a print of a CIS scanned document. The words "CIS PRINT REQUEST" are printed below the DLN on the Form 4251.	

D. DLN UNKNOWN

Oftentimes, the TIN is not known for a "block of documents" request. Only in those instances would the requestor dummy the TIN information field using the following guidelines:

- (a) EINs — 07-0000000
SSNs — 000-00-4320
The underlined portions contain the required values. The non-underlined portions are the suggested numeric values.
- (b) Use an appropriate File Source for the type of document being requested.

Use Request Code C, E, F, G, I, K, O, P or R for Master File documents when the DLN is unknown.

**To delete a request, input an "N" after the Employee Number on Line 3.

The taxpayer's name, address and specific DLN, if known, must be entered in the Remarks Section.

For NMF documents, enter the TIN in the remarks if known, and enter "NMF" in the remarks section.

If the request is for a PRE-ADP document retained under a DLN other than the standard 14 digit DLN, enter in the Remarks Section: PRE-ADP DLN Chargeouts

F. Steps to Take When Return is Charged Out

- (a) Check the DLN for correctness. The most frequent problem is transposition of digits.
- (b) Read the notations placed on the request by Files personnel. For example, a return may not be available because it is being processed under a different SSN or EIN, or the person who has the return may not be able to release it. From the data given determine when to resubmit the request.
- (c) Check for a new refile DLN when chargeout information reflects a function responsible for making corrections to the taxpayer's account. Campus functions most likely to do so are Examination, Adjustments, Statute, and Technical. However, adjustments also may be made in Notice Review, Wage Correction, Special Processing

- functions, and some areas of Accounting.
- (d) Returns that are charged to Campus returns processing functions, such as Unpostables, Rejects, or Error Correction, are usually corrected fairly quickly and returned to Files for refiling. Resubmit these requests within two weeks.
- (e) In the event the return is charged-out and the requester has a lower priority than the person who has possession of the return, the form will be noted to show in the "Remarks" section as to who has the return and why it cannot be released. (See 11 Priorities this section and Section 1 page 1-1 for abbreviations.)
- (f) Other possible notations follow below:

Notation	Definition
Blocking Missing (BNIF)	There is no block or block misfiled. Recheck for DLN error.
CPs 36 and 36A	Duplicate filing. Return charged out. (IMF Notice)
CPs 193 and 193A	Duplicate filing. Return charged out. (BMF Notice)
CP 436	Duplicate filing. Return charged to Adjustment Section—RMF.
CP (), Cycle 19 7411, or Date of Notices	Return was pulled for action in areas, such as Notice Review, Special Processing, Wage Correction, and Adjustments.
No Record (NR)	Used by Research to indicate that there is no record of a particular transaction, usually a tax return, for a given taxpayer.
I/S 8252	Microfilm Index and Settlement Registers were checked through Cycle 198252. NR I/S 8252 means no record of the desired information through Cycle 198252.
A/R 8252	The microfilm Accounts Register was checked through Cycle 8252, and any information found is attached. NR A/R 8252 means no record of the desired information through Cycle 198252.
NRA 8252	Noted only on requests received without a Social Security Number (SSN) or Employer Identification Number (EIN). The microfilm alpha register was checked and the taxpayers name is not listed.
Per Block Sheet	This information is taken from Form D813 or 1332.

G. Employee Assignment Number

- (a) A ten digit number is assigned to every authorized terminal operator. All 10 numeric digits are required unless otherwise stated under a particular command code.
- (1) The first and second digits denote the Campus or File Location Code.
 - (2) The third, fourth and fifth digits denote the organizational function. See below for valid IDRS organization codes.
 - (3) The last five digits denote the individual Employee Number.
- (b) The valid IDRS Organization Codes assigned in the Area offices are:

18 Attachments to Returns

Many functions have items of correspondence, history files, etc., that need to be attached to returns when there is no need to examine the return involved. Only essential items should be attached since file space is very limited.

- (1) If the return has not posted to the Master File but the association of an attachment is deemed necessary the input of a TC 930 may be appropriate. See IRM 102.4.
- (2) There are three restrictions to the use of TC 930.
 - (a) The TC 930 should not be input for a tax return after the return due date as extended unless it is known the return has not posted and should post in the near future.
 - (b) Absolutely no TC 930s should be input more than 36 cycles after return due date as extended or if TC 59X has posted.
 - (c) A TC 930 cannot post and should not be input more than one year in advance of the return due date.
- (3) If IDRS is not available, a Form 3177 should be prepared in accordance with IRM 3.11.70.
- (4) If the latest DLN is known, prepare necessary form, attach it to the front of the attachment item and route it to Campus Files.
- (5) If the attachment must be associated with the return, state this in the remarks section of your input document.
- (6) When Files receives the attachment form or push code notice (generated at the Master File when both the TC 930 and TC 150 have posted), they will associate the attachment with the return indicated. If the return is charged out, they will flag the attachment and leave it in the block to be associated when the return is refiled. There are three exceptions to the flag procedure. The push code notice shows "no record" of the return, the notices shows "not liable—TC 590/591 has posted" or the initiator has indicated that the item must be attached and the return is charged out, the attachment items will be returned to the initiator.

1 Nature of Changes

Description	Page No.
TOP Offset Bypass Indicators	5-2

2 Background

Reference IRM 21.4.6, Refund Offset

IRC Sections 6402(c) and (d), require a taxpayer's overpayment to be applied to any outstanding non-tax child support or Federal agency debt prior to crediting an overpayment to a future tax or making a refund. The IRS has effected these offsets through the DMF Program since 1984.

The Debt Collection Improvement Act of 1996 has authorized the Treasury's Financial Management Service (FMS) to combine the Tax Refund Offset Program with the Treasury Offset Program (TOP). Effective January 11, 1999, FMS began initiating refund offsets to outstanding child support or Federal agency debts. These offsets are referred to as TOP offsets.

3 TOP Offsets

The TOP offset posts as a TC898 with an offset trace number (OTN), an amount, and an XREF field if the offset is for a secondary spouse. TOP offsets occur and post after the IRS has certified a refund to FMS for payment but before FMS direct deposits or mails the refund check. There may be two TC 898's if the refund was issued in a joint name. A secondary SSN field has been added to the refund record sent to FMS to allow TOP to offset to a debt for either spouse on a joint return. An offset bypass indicator (BPI) field has also been added to allow IRS the ability to identify for FMS the eligibility of a refund for TOP offset. The TC 898 will not identify the agency(s) which received the offset.

A TOP offset reduces the amount of the IRS refund by the amount of the TC 898 offset.

Therefore, the amount of a refund certified by IRS to FMS for payment (TC840/846 amount) may not be the amount that is issued by FMS to the taxpayer. The taxpayer may receive less of a refund or none at all if the whole amount is offset. FMS will issue a TOP offset notice when a refund is reduced. If the refund is offset in part, the notice is issued at the time the remainder of the refund is direct deposited or is sent as an attachment with the paper check. If the refund is offset in full, a separate notice is sent with in the same time frames. The notice will inform the TP of the amount of the offset, the agency(s) receiving the offset, and the agency's address and phone number. IRS CP47 and CP149 notices of offset are obsolete.

IRS will continue to process injured spouse claims, Forms 8379, filed against DMF offsets for 6 years from the date of offset. In addition, IRS will process these claims against offsets that occur under TOP within the same statute of limitations. However, unlike former DMF processing, claims filed with an original return will not freeze the overpayment, allowing a TOP offset to occur before it can be processed. **NOTE:** The original return which includes a Form 8379 is given a DLN blocked 92, which posts a TC 570 and sets a -R freeze, preventing a tax or TOP offset until the injured spouse claim can be worked. A TC898 TOP offset is reversed by IRS with a TC 766 with the same OTN. It is reversed by FMS with a TC 899 with the same OTN.

Once the injured spouse's portion of the refund overpayment is determined on an Injured Spouse Claim, filed with the original return, either a TC 808 or 809 will be input. This will systemically allocate the refund(s) and the appropriate BPI will be set. The TC 808 will be used for the primary spouse's share of the refund overpayment, whereas the TC 809 will be used for the secondary spouse's share of the refund overpayment.

4 TOP Offset Bypass Indicators

Effective 1/29/1999, a Top offset Bypass Indicator (BPI) was assigned to all manual and systemic refunds issued by IRS. The BPI is a one digit indicator that identifies for FMS whether the refund is eligible for offset by TOP. Certain BPIs also identify one spouse or the other on joint refund as eligible for offset. This is required for injured spouse claim processing.

A BPI can be systemically generated or input on CC refund when issuing a manual refund. BPI will be posted/displayed along with the TC 840/846 on all output screens such as TXMOD, IMFOL, BMFOL and on MFTRA transcripts.

BPI	Validity	Eligible for TOP Offset
0	IMF & BMF	Refund eligible for TOP Offset
1	IMF	Bypass TOP Offset for primary SSN debts. (used when injured spouse is secondary filer)
2	IMF	Bypass TOP Offset for secondary SSN debts. (Used when injured spouse is primary filer)
3	IMF & BMF	Refund not eligible for TOP Offset.
4	IMF	Bypass TOP Offset for all debts other than child support. Eligible for TOP Offset for child support only. (Used on all refunds other than injured spouse when combat zone (-C) freeze is set.
5	IMF	Bypass Top offset for all primary SSN debts. Bypass TOP offset for all secondary SSN debts except child support. (Used when injured spouse is primary and combat zone (-C) freeze is set)
6	IMF	Bypass Top offset for all secondary SSN debts. Bypass TOP offset for all secondary SSN debts except child support. (Used when injured spouse is primary and combat zone (-C) freeze is set)
7	IMF & BMF	TC 520 Refund not eligible for Top offset except child support.
8	IMF & BMF	TC 520 & Injured Spouse claim primary.
9	IMF & BMF	TC 520 & Injured Spouse claim secondary.

5 Debtor Master File Research

Effective 1/11/1999, CC DMFOL is no longer available to research DMF offsets. Information about a DMF offset can be obtained from various sources. Use Command Codes (CC) IMFOL, BMFOL, INOLEX and TXMOD to identify the DMF transactions.

6 TOP & DMF Source and Reason Codes

Source Code 7 has been reserved exclusively for TOP and DMF adjustments. It must be input with Reason Codes 86, 87, 89, 90 and 91. Source Code 7 results in the following statement on the notice:

"We reversed all or part of the tax refund amount we credited to an outstanding child support, Federal, or State debt because ..."

Reason Codes 86, 87, 89, 90 and 91 complete the statement by indicating specific DMF/TOP adjustments. They are valid only with source code 0 or 7.

86 - an Injured Spouse claim was filed. The spouse not responsible for the debt claimed his/her share of the joint tax refund. Tax law requires that we honor the injured spouse claim.

87 - we have corrected an error found when processing your return.

89 - the offset violated the automatic stay of bankruptcy.

90 - the offset resulted from a payment specifically intended for an outstanding IRS debt.

91 - of revisions on your amended tax return, filed by April 15 of the tax year it was due.

Note: DMF/TOP source and reason codes may not be used in combination with any other IMF source and reason codes.

Section 6 - Initiating and Monitoring Refund Check Tracing Action

1 Nature of Changes

Description	Page No.
Disposition Codes	6-1
Status Codes	6-2

2 Background

Taxpayers who claim an IRS refund check was stolen, not received, lost, or destroyed must complete Form 3911, Taxpayer Statement Regarding Refund Check. This form is processed by Campus refund inquiry function. IRM 21.4, Refund Transactions, provide specific instructions.

3 Command Code "CHKCL"

Reference IRM 21.4.2

After verifying the information on Form 3911, the refund inquiry function initiates tracing action on the check using command code (CC) "CHKCL". This action generates a request for "stop payment" on the check to the Financial Management Service (FMS). (A review of Treasury programs resulted in FMS, a separate agency, assuming sole responsibility for processing claims for lost or stolen refund checks.) Following input of CC "CHKCL", all cases must be monitored to ensure the proper actions take place to resolve the refund inquiry. Although no transaction code will show on the module, disposition and status codes will generate/update in the activity portion of the control base history. These codes can assist other functional areas and area office personnel when monitoring refund inquiry cases and in responding to taxpayer inquiries.

Note: Do not input CC CHKCL if TC 898(s), TOP offset with the same transaction date as the TC 840/846, posted for the full amount of the refund you are tracing. Inform the TP that a TOP offset occurred and that if an offset notice was not received; they must contact the FMS Help Desk to determine the status of the partial payment.

4 Disposition Codes

The first event to be monitored is receipt of a stop pay disposition code. Disposition codes are generated and/or updated by the computer and will indicate whether the stop pay was accepted. If the check is still outstanding, FMS will stop payment and issue the credit back to IRS for subsequent to manual refund to the taxpayer. If the check was negotiated (paid), a photocopy of the check will generally follow or additional action will be necessary.

Note: Asterisked (*) codes below indicate a single digit code followed by a blank.

Disposition Definition Code

01	Claim processed by RFC (acknowledgment)
04	Previously processed. TC740 or 841 should post within 6 weeks.
06	Previous claim.
07	No payment issued or unprocessed claim.
10	Invalid "CHKCL" - Stop Reason Code.
2*	Invalid "CHKCL" - Amount Difference.
3*	Invalid "CHKCL" - Claim Submitted Too Early.
4*	Duplicate claim submitted.

Any line marked with # is for official use only

Disposition Definition**Code**

5*	Invalid direct deposit information submitted.
6*	Duplicate check issued.
7*	Photocopy request processed by RFC on date shown.
9*	Direct deposit trace input with Non-receipt code "P" no FMS 150.1 will generate.
12	Date of event subsequent to date of payment (STOP CODES "E", "T", and "U" only).
13	PAID – DCC reclamation no photocopy
22	Insufficient agency information.
70	TOP Offset - initial disposition code indicating that a TOP offset was associated with the particular refund. Subsequent disposition code to follow.
71	TOP Full Refund Offset - Indicates that the particular refund was offset in full.
72	TOP Partial Refund Offset - indicates that the particular refund was partially offset. The amount that was offset will appear in the secondary amount field. FMS will determine the status of the partial payment.

5 Status Codes

Status codes are generated by computer based on information from the Financial Management Service. Rarely they are input manually by refund inquiry employees using CC ACTON. This enables them to act on cases needing follow-up action by utilizing IDRS Aged Case Listings. Once the disposition code is available, the case is monitored for status update. The "action required", shown below, is for refund inquiry purposes only. The timeframe for each is the average number of days which will elapse before the action is complete. These codes and explanations are not all-inclusive and are only briefly explained. Complete explanations are available in IRM 21.4.2-3.

Status Code	Explanation/Action Required	Days Timeframe
11	Check paid-photocopy and claim to follow/monitor for package.	30

7 Initiating and Monitoring Manual Refunds

It is imperative that initiators closely monitor manual refunds. Duplicate and/or erroneous refunds are caused because initiators failed to monitor accounts weekly to intercept any computer-generated subsequent transactions (e.g., PN TC 846). Offices responsible for causing erroneous refunds will receive feedback from the Center Director.

Procedures for preparing manual refund posting documents appear in IRM 3.17.79, Refund Transactions.

8 Verify Account & Research Outstanding Liabilities

Research the records of accounts (outstanding balances for which a taxpayer (filing joint or single) may be liable if they filed a joint return in a prior year). Use CC INOLE to check for any cross-reference TIN's. Specific instructions for preparing manual refund documentation appears in IRM 21.4.4, Manual Refunds.

9 Exceptions

Debit modules must be satisfied prior to issuing refunds except in the following cases:

- Do not transfer money to accounts in installment status 14.
- Do not transfer money to a module containing a freeze condition which would prevent the computer from offsetting, unless you are transferring a misapplied payment (e.g. V-, -V, -Z, etc.).

10 Research Prior to Issuing Manual Refunds

Research CC IMFOL/BMFOL and TXMOD the day a manual refund is processed to verify that a duplicate refund (TC 846 or PV TC 840) will not be issued. CC IMFOL indicates the Campus where the account is being monitored. Universal IDRS can be researched to verify that a refund is not also being issued by another Campus.

11 Input Hold and Action Codes

Use Hold Code 1, 2 or 4, as applicable, on adjustments to accounts where manual refunds are issued to prevent

erroneous refunds and notices. Input Action Code and TC 971, as applicable. **Do not close control base.**

12 Monitoring the Taxpayer's Account for Posted TC 840

The account must be monitored by the initiator until the TC 840 posts on Master File. Do this monitoring Monday-Wednesday of each week. If during monitoring a computer-generated (TC 846) or pending refund posts to the account, initiate necessary action to stop the refund (CC NOREF) or call Notice Review in the center (refer to IRM 21.4, Customer Service).

13 Closing the Control Base

It may take between 4-6 weeks for the manual refund (TC 840) to post if processed on Form 3753, Manual Refund Posting Voucher. Once the TC 840 posts to the account, close the control base. Initiators of manual refunds must take all actions needed to prevent erroneous refunds.

Section 7 - Automated Non Master File

1 Nature of Changes

Description	Page No.
ANMF access	7-1
Large dollar account change	7-1
New IRM Reference for Account Specialist	7-2

2 Background

The processing of Non Master File accounts has existed for several years. At one time the processing of NMF accounts consisted of manually posting account activity onto a Unit Ledger Card. This process was changed in 1991 with the introduction of the Automated Non Master File (ANMF) system.

The ANMF data base contains all open, closed and archived Non Master File (NMF) accounts processed at the Cincinnati Submission Processing Campus. Unlike the Master File, where all assessments for the same tax period are posted to one account, a NMF account is established for each assessment. Therefore, the NMF taxpayer may have several accounts for the same tax period (IRC 6201).

Accessing data on the ANMF database for research purposes is accomplished by submitting an OL5081.

There are six basic conditions which require NMF processing:

- (1) **Large Dollar Accounts** - Accounts which have balances too large for the Master File to process.
Note: Effective January 1, 2010, IMF will allow accounts that are less than \$1 Billion to post.
- (2) **Overflow Accounts** - Accounts which have an excessive amount of transactions for the Master File to systemically process.
- (3) **New Legislation** - Accounts which require immediate tax law implementation, but time does not permit for extensive modifications to the Master File.
- (4) **Immediate Legal Assessments** - Accounts which require immediate (24 hours) legal assessments when the Master File would be too slow to post the assessments.
- (5) **Reversal of Erroneous Abatements** - Accounts which require reversal of erroneous abatements when the statute for assessment (ASED) has expired.
- (6) **Child Support Cases** - Child Support cases where collections of payments have been ordered by state courts but have fallen into arrears.

As of January 2012, there are approximately 17,000 open NMF accounts nationwide.

3 All NMF Notices now have Toll-Free Numbers

In keeping with our commitment to IRS' Mission statement, all NMF Notices include 1-888-829-7434 as a Toll Free Number for taxpayers to inquire about their notice. Upon dialing the Toll Free Number, the call is directed to the appropriate campus based on the taxpayer's area code.

4 Account Specialist

The NMF Account Specialist provides technical assistance on complex Non-Master File issues and individual accounts and performs similar work as that found in the majority of non-supervisory positions assigned to the unit. Complete details are available in IRM 3.17.46.

5 NMF Customer Service Representative (CSR)

There are Customer Service Representatives (CSR) at each campus designated to respond to NMF taxpayers calling the Toll Free Number. CSRs access the ANMF system to review the taxpayer's account and reply accordingly. Procedures in handling NMF accounts are incorporated into the Customer Service IRM 21.

6 User Friendly Transcript

A "Taxpayer Friendly" transcript can be requested on NMF. This transcript should be sent to the taxpayer in lieu of a hand written tax account. (For more details see IRM 3.17.46.13.2).

7 Pocket Vest Guide

Pocket Vest Guide Document 10978 is available through your local SID Site. It contains a MF to NMF Conversion chart, Pending Transcription Identification Codes, frequently used Toll Free Numbers, Abstracts, Doc Codes, MFTs, True Tax Class and other information.

8 Business Operating Division (BOD) Codes and Client Codes

In October 2000, the ANMF database was updated with the respective BOD Codes (BODC) from the Master File accounts as indicated below. Originators are responsible for annotating the BODC on all documentation for processing to NMF.

MF	BOD	BODC	MF	BOD	BODC
IMF	Wage & Investment	WI	BMF	Large & Mid-Sized Business (T/C 150 is > \$10,000,000.00)	LM
BMF	Small Business & Self Employed (T/C 150 is < \$10,000,000.00)	SB	EPMF	Tax Exempt & Government Entities	TE

Each Business Operating Division is responsible for assigning the BODC to the taxpayer's account. The purpose of these codes is to further categorize the taxpayer's account within the BOD.

9 Child Support

The ANMF system provides a means for assessing, collecting and reporting of Full Collection Child Support payments. # State Child Support Enforcement Agencies provide the Secretary of Health and Human Services (HHS) with information # of certain individuals (obligors) [REDACTED]. HHS will certify and forward the case to IRS for # collection activity. (For more details see IRM 3.17.46.6). #

2Section 8A - Master File Codes - Transaction, MF and IDRS Collection Status, Freeze and IDRS Status 48, Restrictive and Filing Requirement

1 Nature of Changes

Description	Page No.
Transaction Codes	8A - 1
MF and IDRS Collection Status Codes	8A-37
Master File Freeze Codes and IDRS status 48	8A-41
Restrictive Conditions	8A-48
Filing Requirement Codes (FR Codes)	8A-48

2 Transaction Codes

Transaction Codes (TC) consist of three digits. They are used to identify a transaction being processed and to maintain a history of actions posted to a taxpayer's account on the Master File. Every transaction processed by ADP must contain a Transaction Code to maintain Accounting Controls of debits and credits, to cause the computer at ECC to post the transaction on the Master File, to permit compilation of reports, and to identify the transaction when a transcript is extracted from the Master File. Transaction codes that are unique to IDRS are also included.

The definitions of several transaction codes are necessarily changed since there will be no resequencing, offsetting, or computer generated interest. In addition, all refunds will be scheduled manually with the refunds posted to the IMF using TC 840.

Refer to Section 14.7 for pending transaction and merged related codes.

Reversal Codes

An "R" following the transaction code indicates the transaction has been reversed.

The Reversal Code indicates the transaction has been reversed. Its valid values are "0", indicating no reversal and "1" indicating a reversal. An 'R' following the transaction code display indicates the transaction has been reversed.

IMF Payment or penalty transaction codes ending with a transaction code of "3" which are NOT LISTED in this section are actually reversed transactions which originally ended with a transaction code of "0". For programming purposes, the "0" in the third position of the transaction code has been converted to "3" to indicate the original payment or penalty transactions (or portion of it) which has been reversed. However, for account analysis purposes, those IMF payment/penalty transaction codes ending with a "3" which are NOT LISTED in this section should be treated as transactions which have been reversed (reversal code = "1")."

4 Master File Freeze Codes and IDRS status 48

Master file processing uses alpha codes to identify specific conditions that are generated either systemically, during the processing operation, or manually, through input of a transaction code. These alpha codes are commonly referred to as “freeze” codes. This term is misleading since not all alpha codes indicate activity within a module or account is frozen. Various IDRS conditions also affect the status of a module. Assessment/abatement actions, refunds, offsets, status updates, issuance of TDA balance due notices or suspension of a CSED can be affected by these alpha codes or IDRS conditions.

—A	I/B/A	Duplicate Return Freeze—Initiated by TC 976 return (with or without “G” code) or generated (IMF & BMF) from the posting of TC 971 with action code 10 or 12-15. IMF only—TC 150 if amended return freeze (E—) is present, TC 977 if TC 150 is present (except if the DLNs are equal or the TC 977 DLN has a doc code 11 with B.S. 99X), TC 290 (B.S. 200-289) posts to a module with amended/duplicate freeze or unreversed TC 576 is present.	IMF: TC29X (except blocked 2XX or priority code 6, or 7, (except TC 291 with priority code 7 blocked 740-769); TC 30X with priority code 1 or 3 (except with 51 doc code). Status 48	I/B	Command Code STAUP is input to balance due modules in notice status to suspend collection activity. Updates module to SC status 48. This status will now be sent to MF to mark modules in IDRS status 48. The master files will post the status 48 behind the current status. IDRS balance due notices or TDA issuance is suppressed for the requested number of cycles (up to 15).	Input of CC STAUP with next status and number of cycles, or systemically at expiration of control base information or number of cycles originally input unless a restrictive condition is present.

#

5 Restrictive Conditions

IDRS balance due processing identifies certain restrictive conditions which prohibit issuance of balance due notice and TDA. If a restrictive condition exists on a tax module eligible for update to notice of TDA status, the module will not update to the next status. It will be analyzed in the next processing cycle for issuance of the appropriate status.

Note: These conditions must be taken into consideration when a command code or transaction code are input to reactivate the balance due notice/TDA routine. If any of the conditions below are present on a module/account, IDRS will not update the status or resume balance due notice/TDA issuance until all restrictive conditions are removed.

6 Filing Requirement Codes (FR Codes)

FR Codes are posted to the Entity Section of the Master File to identify the types of returns a taxpayer must file. They are not to be confused with Mail Filing Requirement Codes (MFR) which are used to identify the types of forms the IRS must mail to the taxpayer. The MFR codes follow the Quick Reference chart below.

2 Unpostable Codes - GUF

Unpostable transactions are those transactions which cannot be posted to the Master File. A transaction which fails to post to an account at MCC is returned to the Campus for corrective action. Each SC is responsible for maintaining a complete record on tape of all unresolved unpostables originating from the SC. New unpostable items are added and corrected items are deleted from this tape. Each week a Martinsburg Computing Center created unpostable tape is received at the SC. From this tape realtime is updated and information can be obtained via GUF Command Codes. Additionally, an Unpostable Register and several control listings are generated and maintained to insure the later correction or nullification of the unpostable items. Unpostable Codes (UPC) identify the condition which caused the transaction to be unpostable. See IRM 3.12.179 (SC Error Resolution of IMF and BMF Unpostables) for additional information.

3 Unpostable Codes - IMF

All IMF Unpostable Codes (UPC) will be three numeric positions. There will also be a 1 position Reason Code. Comprehensive unpostable code descriptions are found in the sections referenced for each unpostable with the exception of various UPC 29X.

UPC	RC	Description	
126	0	TC 150 input to a module containing a TC 971 AC 121. Also unpost if TC 971 AC 121 is input in the same cycle as the TC 150. Bypass for C-UPC 126	
127	0	TC 150/430 (entity code 1 or 3) or 01X containing an address that has a zero or invalid ULC in the location code field.

130	0	Input transaction contains information that causes a halt in the posting run. Currently, the program halts, the transaction is found, and a reject is manually prepared. In lieu of this manual process, the transaction will resequence 1 cycle and then be sent UPC 130.	
131	0		#

134	0	Reserved.	
	1	Reserved.

	3	Unpost any TC 011, 013 (with reverse validity), 040, or 041 attempting to post to an account containing an unreversed TC 898 with a transaction date that is within 6 years of the current <u>23C</u> date. Note that a TC 898 is considered reversed if the net of TC 898/899/76X all with matching <u>OTN</u> net to 0. Include memo money in the netting. Also note that these transactions will resequence 1 week prior to unposting. Bypass this unpostable if the Scrambled SSN indicator is set to 10 or 12

	1	TC 150 with Primary SSN starting with 9 containing <u>EIC</u> Computer from section 6 of the input return or containing a 1 in position 1 of the exemption code field. Bypass these checks if the SSN is in the ITIN range (middle 2 digits are 70-88). Also bypass the exemption portion of the unpostable if the Exemption Positions Verified field contains a 0 in position 1 or if the return contains RPC O.	
137	1	TC 898 with doc code 45 if after resequencing for 10 weeks, the module does not contain a TC 840 with matching DLN.	
	2	a. When matching against a refund posted by IMF If the doc code of the TC 898 is 77, the transaction date must be within 12 days of a prior posted <u>EFT</u> TC 846 or within 6 days of a paper refund. Do not perform a date check for TC 898 with other than doc code 77. Effective 2012 and subsequent, also match against the Refund Payment Date. Allow the posting if it matches any of these dates b. When matching against a refund posted by old <u>CADE</u> (has DD portion of posting cycle not = 08 and posted prior to 2012) If the doc code of the TC 898 is 77, and if the original refund is EFT, the transaction date of the 898 must be <= to the TC 846 minus 2 days and >= to the TC 846 minus 8 days. If the original refund is a paper refund, the TC 898 must be dated <= the date of the TC 846 and >= the TC 846 minus 8 days	
	3	The <u>memo amount</u> of TC 898 is greater than the money amount of the matched TC 840/846. If the module contains multiple TC 898/899 transactions with the same date, these must be netted when performing this check. Also unpost the TC 898 if the <u>Split Refund</u> Indicator is not the same as the <u>Split Refund</u> indicator on the matched TC 846.	
	4	TC 899 containing an <u>OTN</u> that does not match the <u>OTN</u> of a prior posted TC 898. Also unpost the TC 899 if the <u>Split Refund</u> Indicator does not match the <u>Split Refund</u> indicator of a prior posted TC 898	
	5	a. TC 899 with Record Type 1-3 containing a <u>memo amount</u> that exceeds the net amount of a prior posted TC 898/899 with the same <u>OTN</u> minus the net of TC 76X with the same <u>OTN</u> . b. TC 899 Record Type 4 if the module does not contain a TC 899 Record Type 2 with matching <u>OTN</u> . If found, unpost unless the net <u>memo amount</u> of the TC 899 Record Type 2 minus prior posted TC 899 with Record Type 4 (all with matching <u>OTNs</u>) is equal or greater than the input TC 899 Record Type 4.	

	6	TC 899 containing a Spouse's SSN that does not match the Spouse's SSN of a prior posted TC 89X with the same OTN.	
138	0	a. TC 720, 740, or 841 greater than the net amount of the posted 72X or 84X transactions.	
		b. TC 841 b/s 77777 if the module does not contain an <u>EFT</u> TC 846.	
		c. TC 740 or TC 841 must match the amount of a TC 846 unless the module contains a TC 898 with a transaction date that is equal to the TC 840/846. If it does, then unpost 138 if the input transaction does not match an amount of a prior posted TC 840 or TC 846. Also unpost if the TC 841 contains block and serial 77777 if the module does not contain a prior posted <u>EFT</u> refund. TC 740 will UPC 194 if the amount is less than a prior posted TC 840 or TC 846. Effective 1/1999 and subsequent, due to the FMS takeover of DMF processing, TC 841/740 may be less than the money amount of the TC 840/846 providing the module contains a TC 898. In this situation, the TC 740/841 must be greater than or equal to the TC 840/846 minus TC 898 minus TC 899 Record Type 1 or 3. In all cases, the <u>OTN</u> must match the <u>OTN</u> of the TC 898. Be careful if the module has 2 refunds in the same cycle. Need to associate all the transactions correctly. If any of the condition below are not met unpost TC 841

All Unpostable Codes (UPC) will be 3 numeric positions. There will also be a 1 position Reason Code (RC) separate from the unpostable code. BMF unpostable conditions and resolutions can be found in BMF IRM 3.12.279 and BMF Entity IRM 3.13.222. Also EO unpostable conditions and resolutions can be found in IRM 3.12.278, EO Unpostable Resolution.

The following Unpostable Codes (UPC) are written onto the Unpostable Tape to identify transactions that fail to meet validity checks as described below. The Reason Code (RC) is defined for each UPC.

CP36's other than CP36's listed below.

- "IRS Notice". Use "2" when: Any notice (either sent to the TP or internal) is generated on the same issue. The account could be in any status, with any module balance (zero, debit, or credit). Include CP36's where the TP files amended returns as the result of prior IRS notice, such as a math error notice.
- "Legislation". Use "3" when: Any adjustment action is required because of new legislation either makes an issue effective retroactively or laws were passed too late to include the changes on current forms. Include any protective claims held pending Tax Court decisions.
- "IRS Error". Use "4" when: The adjustment is the result of any error made by an IRS employee. The account could be in any status, with any module balance. It does not matter if the taxpayer pointed out this error, or whether IRS discovered it before taxpayer contact.
- Tentative Carryback (TCB/Restricted Interest). Leave blank, SC "5" will automatically generate whenever TCs 294, 295, 298 or 299 are input.
- "Use "6" when the adjustment is the result of the TP making a math error on the claim/Form 1040X/Duplicate filing. The notice (if one is sent to the TP) will include the math error 60 day appeal rights. DO NOT use "6" for an adjustment based on the TP's response to a previous math error notice.
- Source Code "7" will apply only to Debtor Master File (DMF) cases. Valid with Reason Codes 86/87/89/90/91 only.
- Source Code "9" is used by Underreporter Function. TC 29X, B/S 650-679.

Reason Code Description

** RCs marked with two asterisks print in Spanish when the entity filing requirement is '7'.
RC 042 prints in Spanish only.

(3) Penalty Reason Codes — IMF - BMF-EPMF

(4) Hold Codes

Use this code with TC 29X or TC 30X (Doc Code 54 or 47) when it is desired to prevent or delay the issuance of a refund and/or notice, such as when a particular adjustment action is cycled, or when a correction is being made to an account without the taxpayer's knowledge. Valid codes are:

Code	Action
0	No Hold Code
1	If net module balance after posting is credit, holds credit until: Doc. Code 24 or 34 posts, TC 820 or 830 posts, TC 29X or 30X posts, Doc. Code 51 with secondary TC 300 posts, or total module balance becomes zero or debit. Set — K freeze.
2	Same as "1" but holds notice and credit.
3	prevents the issuance of the adjustment notice for the adjustment transaction on which it is entered. It does not prevent the issuance of any other notice.
4	Same as "1" except that a notice will not be issued at any time. MFT 61 and 63 only: suppresses CP243
5	MFT 61, 63 only: suppresses CP 243. If both hold Codes 4 and 5 should be used, use hold Code 4.

(5) Priority Codes

These codes must be used in order to post adjustments (Doc Code 47 or 54) to the Master File when certain module conditions exist. Failure to use the priority code when specified will cause the transactions to unpost, causing erroneous notices, refunding or billing especially in cases where multiple adjustments and/or credit transfers are being processed. If an adjustment needs a priority code it may indicate that Collection, Examination, or Statute should be consulted. It may also question the validity of a tax abatement, i.e. an abatement of tax on a return with a Collection Field Function Secured Return Code, no math error code, and the module is in Status 60 is questionable insofar as the return was assessed as filed, filed late, and contained the information that the taxpayer wanted the Revenue Officer to see.

Code Action (Doc Code 54; TC 29X)

1	Use priority Code 1 when adjusting tax with TC 290, 291, 298 or 299 and unreversed TC 420, Examination Indicator, or TC 424 Examination Request is present. Failure to use the priority code will cause the adjustment to unpost (UPC 330 or 160). A TC 290 for zero amount without credit reference number 766 or 806, will post without a priority code. NOTE: TCs 290/298 without Credit Reference Number 766 or 806 will post without priority code 1 when an open TC 420 is present. Use also if both codes 1 and 8 are required to adjust an account.
2	Use when both priority codes 1 and 3 are required to adjust an account.
3	Use when inputting an adjustment which is IRS initiated when considering the 45 day interest-free period.
4	Use with manual release of the BMF offset-out Q freeze on transaction code 290 for zero amount. (No secondary transaction codes or reference numbers are valid with input). For IMF OR BMF PRIORITY CODE 4 is only valid for statute unit employees with unit number in the range 569-574.
5	Causes IMF or BMF MCC posting process to generate and post assessments (or abatements) of accrued, unrestricted FTP penalty and/or interest. May be used with TC 290 or TC 300 for any amount and in combination with other transaction codes.
6	Used to release a math error freeze only.
7	Use with adjustments in block 740-769 to have an unsubstantiated math error protest sent to Examination. Also, use with an adjustment in block 700-739 when the protest is substantiated and there is an unreversed TC 576 in the module. TC 470 CC 94 must be present for priority Code 7 to post.
8	Use with TC 29X transactions to bypass UPC 158 and 180 (IMF) and UPC 328 (BMF) analysis on original input. Used when adjusting TC 806/807 if a prior TC 17X transaction is on the account and the new TC 176 is to be computer generated. Also used to release excess Estimated Tax Credit

Code Action (Doc Code 54; TC 29X)

Freeze (J-) and -X freeze. Both released by TC 29X with Priority Code 8. **Note:** Priority Code 8 is required when a TC 764 is input with TC 29X and there is a prior posted TC 29X that does not contain Priority Code 6 or a Julian Date of 999.

9 Used with TC 291 blocked 200-299 to bypass UPC 150 (IMF) and UPC 350 (BMF).

6 No Merge Reason Codes

Complete transcripts of both the “from” and “to” accounts are generated when accounts will not merge. The following merge fail conditions pertain to tax modules on BMF and the entire account of IMF.

REASON CODES

IMF	BMF	Transcript	Description
21	01	NOMRG-400	40 Hold on in either module with an equal tax period.
01	02	NOMRG-VEST	Vestigial Record for which there is a tax module or Vestigial record with an equal tax period in the other account.
05	03	NOMRG-DUP	Duplicate Return (both Tax Mods in a merging pair contain a TC 150) or more than 25 Tax Mods involved in merge.
07	04	NOMRG-930	Both modules for the same tax periods have unreversed TC930's with Form 3520 indicator or both modules contain unreversed TC 424's.
09	06	NOMRG-520	Both accounts contain modules (for the same tax period) with unreversed TC 520's (except cc 81, 83 and 85-88).
11	07	NOMRG-RPS	Both accounts have a module for the same tax period containing a TC150 and multiple TC610s (one of which is RPS) or S coded TC150 in 1 module and the RPS TC610 that does not match the DLN of the TC150 in the other.

92	09	NOMRG-CONS	Both TINs have the same MFT/TXPD which when consolidated would exceed

Any line marked with # is for official use only

REASON CODES			
IMF	BMF	Transcript	Description
03	10	NOMRG-TDA	20,900 bytes. Both accounts contain modules (with the same tax period) in TDA/TDI status and the Location Codes (Primary or Secondary) do not agree.
	30	IMF — CP 37 BMF — CP 201	Name Control Mismatched
	31	CP 200	Inactive
	32	NOMRG-91X	Either TIN contains an unreversed TC 910/914/918 or both TINs contain different Agent ID's.
	33	CP 202	Filing Requirement Code Mismatch Incompatible conditions present per UPC 429; Unreversed TC 090 or 1120s on one TIN and other TIN does not have 1120 FRC = to 00 or 02; one TIN has 1120 FRC of 14 and the other has 1120 FRC other than 00, 01, or 14; Unreversed TC 060 on F-1120 FRC = 15 and the other TIN has 1120 FRC other than 0 or 15.
02		NOMRG-XSSN	Significant scrambled SSN indicator and MFR = 8 in either account.
04		NOMRG-91X	Unreversed TC 914 posted in only one Tax mod of a merging pair or TC 914/916 in matching Tax Mods but the FLC's of their DLNs do not match.
06		NOMRG-576	Debit Module/TC576 (Unreversed TC 570 in one module and unreversed TC 576 in the other of a merging pair).
	11	NOMRG-AB11	MFT 03 TXPDs for 8806, 8903 and 9003 will not merge if a TC 150 with a significant Abstract 11 transfer amount or an unreversed TC 766 with a Doc. Code other than 47, 51, or 54 is posted on either TIN.
	12	NOMRG-8752	Form 8752 TXPD which contains a TC 150 with a significant transfer amount or an unreversed TC 766 with a unique DLN.
10		NOMRG-424	Both accounts with modules for the same tax period contain a combination of an unreversed TC 930 (without Form 3520 indicator) and TC424. TC930 module should not have a TC150.
16		NOMRG-TAXI	Both accounts contain TAXI/BUS in matching tax period modules and the merge of both there modules will cause more than 52 TC766 Doc Cod 54, blocking series 490-499 in the resulting module.
19		NOMRG-CPNL	Both accounts have Civil Penalty (CP) Name lines but the Name Controls mismatch.
90		NOMRG-90	Transaction sent back from CADE that is unable to post will resequence code 90.
92			MFT 55 Tax Mods both contain TC 608 - or resulting merged Tax Module will exceed the maximum allowed Module size.
20			ATS - both accounts have unreversed TC 810s for the same tax period
	22	NOMRG-SS	Both accounts have subsection codes that are not equal.
	23	NOMRG-STAT	Statuses are incompatible.
	24	NOMRG-GEN	Accounts have unequal GEN numbers.
	25	NOMRG-AF	One account has Affiliation Code 6 or 8 and the other has Affiliation Code 7 or 9.
12			TC 918 in both Entities
13			TC 916 in only one Tax Mod (of a merging pair) or matching tax modules do not contain matching TC916s (DO code in both DLN's do not match)
15			TC 060 in both Entities, but they are not identical

Please file these forms as appropriate.
- 037 We changed the amount reported as household employment taxes on page 2 of your tax return because of an error on Schedule H, *Household Employment Tax*. The advanced earned income credit payment can't be more than the appropriate percentage of the total wages you paid.

If you are entitled to a refund of excise taxes, Form 8849, *Claim for Refund of Excise Taxes*, should be filed separately from your Form 1040. We detached the form from your tax return and are processing it separately.
- 043 We didn't allow your household employment taxes on page 2 your tax return. Schedule H, *Household Employment Taxes*, can't be filed with your Form 1040, because the fiscal tax period for your Form 1040 ends before December 31, 1995. The following logic should be applied to the domestic IMF TPNCs (TPNCs 101-299 and 501-799):

- Current Year 2003 Tax Returns – TPNCs should be based on the Form Number. If a TPNC is not available for the specific form type, the default TPNC should be used.
- Prior Year (TY02 and prior) Tax Returns – The default TPNC should be used for all returns that are not equal to the current processing year.
- Converted Tax Returns – If TPNC 111 is present, print the default language for all assigned TPNCs. This applies to current year and prior year returns. TPNC 111 will always be used in conjunction with additional TPNCs.
- Any International Return (Current and Prior Year) – The default TPNC should be used for all returns with an assignment of an IMF domestic TPNC that have an International Form Type.

The Document Library System (DLS) developer will use the following rules to process the TPNCs:

- TPNCs with Default Form Type will be suffixed with a letter “D”.
- TPNCs with Form Type 1040 will be suffixed with a letter “L”.
- TPNCs with Form Type 1040A will be suffixed with a letter “A”.
- TPNCs with Form Type 1040EZ will be suffixed with a letter “E”.
- TPNCs with Form Type 1040NR will be suffixed with a letter “N”.
- TPNCs with Form Type 1040NR-EZ will be suffixed with a letter “Z”.
- TPNCs with Form Type 1040PR will be suffixed with a letter “P”.
- TPNCs with Form Type 1040SS will be suffixed with a letter “S”.

IMF Input Code	Explanation of Penalty and Interest Charges
-----------------------	--

01	Filing and Paying Late - A combined penalty has been added because your return was filed late and the tax was not paid when due. The penalty is figured at 5 percent of the unpaid tax for each month or part of a month the return was late. It cannot be more than 25 percent of the tax paid late. For income tax returns due after December 31, 1982 that are filed more than 60 days late, the penalty will not be less than \$100 or 100 percent of the balance of tax due on your return, whichever is smaller.
02	Underpayment of Estimated Tax - A penalty has been added because your estimated tax was underpaid. Generally, this penalty is charged when the total tax payments made on time are less than 90 percent of the tax shown on the return. The penalty is figured daily for the time the tax remains unpaid. However, all or part of this penalty can be removed if you meet any of the exceptions listed in the instructions on Form 2210 (Underpayment of Estimated Tax by Individuals). The penalty may also be removed if your underpayment was due to casualty, disaster, or other unusual circumstances. In addition, it may be removed if you had a reasonable cause for not making a payment and you either retired after age 62 or became disabled in the tax year a payment was due, or in the preceding year.
04	Dishonored Check - A penalty has been added because your check to us was not honored by your bank. For checks of less than \$15.00, the penalty is the amount of the check. For checks of more than \$15.00 to \$750.00, the penalty charge is \$15.00. For checks \$750.01 and greater, the penalty charge is 2% of the amount of the remittance.
05	Fraud - A penalty has been added for fraud. It is 50 percent of the underpaid tax, plus 50 percent of the interest due on the portion of the underpayment attributable to fraud. This 50 percent of the interest charge is a penalty and cannot be deducted from Federal taxes.
06	Negligence - A penalty has been added for negligence. It is figured at 5 percent of the underpaid tax, plus 50 percent of the interest charge. This 50 percent of the interest charge is a penalty and cannot be deducted from Federal taxes.
07	Failure to Pay - A penalty has been added because your tax was not paid when due. The penalty is 1/2 of 1 percent of the tax not paid on time. It is figured for each month or part of a month the payment

- was late and cannot be more than 25 percent of the tax paid late. However, any period used in figuring a penalty explained in Code 01 has not been included in figuring this penalty.
- 08 Missing Social Security Number - A penalty has been added because your return did not include your social security number, or your spouse's number if you are married and filing a joint return or married and filing separate returns. The penalty is \$50 for each time a required number was not included.
- 09 Interest - Interest is figured from the due date of the return to the date of full payment or to the date of this notice.

- 01 Delinquent Filing Penalty - A combined penalty has been added because your return was filed late and the tax was not paid when due. The penalty is figured as 5 percent of the unpaid tax for each month or part of the month the return was late. It cannot be more than 25 percent of the tax paid late. For income tax returns after December 31, 1982, that are filed more than 60 days late, the penalty will not be less than \$100 or 100 percent of the balance of tax due on your return, whichever is smaller.
- 02 Estimated Tax Penalty - A penalty has been added because your estimated tax was underpaid. Generally, this penalty is charged when the total tax payments made on time are less than 90 percent of the tax shown on the return. The penalty is figured daily for the time the tax remains unpaid. However, all or part of this penalty can be removed if you meet any of the exceptions listed in the instructions on Form 2220 (Underpayment of Estimated Tax by Corporations). These are the only exceptions that can be accepted.
- 03 Failure to Deposit - We charged a penalty because it appears that you didn't deposit the correct amounts of tax on time. We used your record of Tax Liability to determine where to apply your deposits. We applied your deposits in the date order we received them. We figured the penalty on any tax not deposited, deposited late, or not deposited in the correct amounts. For deposits due after 12/31/89, the penalty rate varies as follows:
 2% - deposits made 1 to 5 days late
 5% - deposits made 6 to 15 days late
 10% - deposits made 16 days or more late, but on or before the 10th day after the date of the first notice we sent you asking for the tax you owe.
- 04 Dishonored Check - We charged a penalty because your bank did not honor your check. For checks of \$1,250 or more, the penalty is 2% of your check amount. For checks of less than \$1,250, the penalty is the check amount or \$25, whichever is less.
- 05 Fraud - The penalty is 75% of the tax you didn't pay due to fraud (50% of the tax you didn't pay due to fraud on returns required to be filed before 1/1/87, not including extensions. For tax you didn't pay due to fraud on returns required to be filed before 1/1/89, the penalty includes an additional 50% of the interest charged on the part of your underpayment due to fraud. This additional interest charge is a penalty and cannot be deducted from your federal taxes.
- 06 Negligence Penalty - We charged a penalty of 5% on your unpaid tax. For underpayments on returns due before 1/1/89, not including extensions, we charged an additional 50% of the interest on the part of your underpayment due to negligence. This additional interest charge is a penalty and cannot be deducted from your federal taxes.
- 07 Failure to Pay - We charged a penalty because, according to our records, you didn't pay your tax on time. Initially the penalty is 1/2 of 1% of the unpaid tax for each month or part of a month you didn't pay your tax. If we issue a Notice of Intent to Levy and you don't pay the balance due within 10 days from the date of the notice, the penalty increases to 1% a month. The penalty can't be more than 25% of the tax paid late.
- 08 Missing Taxpayer Identifying Number (TIN) - We charge a penalty when you don't provide a social security number (SSN) for yourself, your dependent, or another person. We also charge a penalty when you don't provide your own SSN to another person or if you don't include your employer identification number on an information return. The penalty of \$5 for each missing TIN the law requires on returns and statements due by 12/31/89. The penalty is \$50 for each missing TIN the law requires on returns and statements due after 12/31/89.
- 09 Interest - Interest is figured on unpaid tax from the due date of the return to the date of full payment or

- to the date of this notice.
- 10 Daily Delinquency Penalty - A penalty has been added because your explanation for filing your return was not acceptable as reasonable cause. The penalty is \$10 a day for each day the return was late, but cannot be more than \$5,000.
- 11 Failure to Deposit - We charged a penalty because it appears that you didn't deposit the correct amounts of tax on time. Also, your Record of Federal Tax Liability was incomplete or illegible, or the liability amounts you reported didn't equal the net taxes for the tax period. Therefore, we averaged the total tax liability and equally distributed it throughout the tax period. We applied your deposits to the averaged liabilities in the date order we received them. We figured the penalty on any tax not deposited, deposited late or not deposited in the correct amounts. For deposits due after 12/31/89, the penalty rate is as follows:
- 2% - deposits made 1 to 5 days late,
 - 5% - deposits made 6 to 16 days late,
 - 10% - deposits made 16 or more days late, but on or before the 10th day after the date of the first notice we sent you asking for the tax you owe. When you don't pay the amount you owe within ten days of the date of the first notice we sent you, we automatically increase the penalty rate to 15% and include the additional penalty in the next bill.
- 12 Incomplete Return Penalty - We charged you a penalty because, according to our records, you didn't file a complete return. The penalty is \$10 a day for each day the return was incomplete, but may not be more than \$5,000 or 5% of your gross receipts for the year, whichever is less.

2 General Background

This is a new Section 10 – Penalties and Interest Provisions incorporating content from Sections 8, 10, and 11 in prior Doc. 6209 editions. Section 10 provides penalty and interest policy guidelines, processing codes and additional information from the Office of Servicewide Penalties (OSP) and the Office of Servicewide Interest (OSI). The following web site links provide additional penalty and interest information.

3 Interest Rates

The Interest Rate Tables are located on the Servicewide Electronic Research Program (SERP) web site at http://serp.enterprise.irs.gov/databases/irm-sup.dr/interest_rates.htm. This web site contains all of the applicable interest rates to calculate interest on tax balances.

4 Penalty Provisions

In general, for every filing, paying, and reporting requirement imposed by the Internal Revenue Code, there is a penalty provision for failing to comply with the requirement. This section does not contain information on all penalty provisions. For additional penalty provisions see IRM 20.1, *Penalty Handbook*.

Penalty Rate and Information

The penalty is 5% of the tax unpaid on the return due date (without regard to extensions) for each month or part of a month that the return is late, not to exceed

Any line marked with # is for official use only

Type of Penalty	Penalty Rate and Information
Failure to Pay Tax Shown on the Return IRC § 6651(a)(2)	<p>25%. When an income tax return is 60 days or more late, the minimum penalty is \$135 (\$100 for returns due before 1/1/2009), or 100% of the unpaid tax, whichever is less.</p> <p>The penalty is 1/2% of the tax shown on the return that is not paid by the return due date without regard to extensions. The penalty is charged on the unpaid tax for each month or part of a month that the tax remains unpaid, but it cannot exceed 25% in the aggregate.</p> <p>When both of the above penalties apply for the same month, the Failure to File penalty is reduced by the amount of the Failure to Pay penalty for that month, unless the minimum Failure to File penalty applies.</p>
Failure to Pay Tax Upon Notice and Demand for Payment IRC § 6651(a)(3)	<p>The penalty is 1/2% of the tax in the notice and demand for payment that remains unpaid 21 calendar days (10 business days, if the total due in the notice was \$100,000 or more) after the date of the notice. The penalty is charged on the unpaid tax for each month or part of a month that the tax remains unpaid, but it cannot exceed 25% in the aggregate.</p> <p>Both <i>Failure to Pay</i> penalty rates are increased to 1% per month on any tax that remains unpaid 10 days after IRS has issued a Notice of Intent to Levy Certain Assets. Issuance of such a notice is identified by notice status 58, TC 971 with action code 035 or 069, or by an assessment with doc code 51 and blocking series 14X.</p> <p>The penalty rate for Failure to Pay Tax Upon Notice and Demand for Immediate Payment is 1% as of the date of the notice for any jeopardy assessment. Jeopardy assessments are identified by doc code 51 with blocking series 100 - 119.</p>
Failure to Deposit Taxes IRC § 6656	<p>For individual taxpayers who filed on time, any Failure to Pay penalty rates are decreased to 1/4% per month during any month during which the taxpayer has an approved installment agreement with the IRS for that tax.</p> <p>For deposits required after December 31, 1989, there is a four-tiered penalty. The penalty is 2 percent for deposits 1-5 days late, 5 percent for deposits 6-15 days late, 10 percent for all direct payments and those deposits more than 15 days late, but paid on or before the 10th day following notice and demand, and 15 percent (actually, a 5 percent addition to the 10 percent) for late undeposited taxes still unpaid after the 10th day following the first balance due notice or the day on which notice and demand for immediate payment is given.</p>
Failure to Pay Estimated Tax IRC § 6654 & IRC § 6655	<p>The penalty is determined by multiplying the daily interest rate in effect for a given day by any underpaid installment amount for that day. The total penalty is the aggregate of the penalty for all days during which an underpayment exists.</p>
Bad Checks IRC § 6657	<p>The penalty is two percent (2%) of the amount of the dishonored payment instrument, or if the amount of the dishonored payment instrument is less than \$1,250, then the penalty is the lesser of \$25 or the amount of the payment. Effective July 2, 2010, the penalty now includes all "instruments" (forms) of payment.</p>
Dishonored Paper Checks or Money Orders/Insufficient Funds on Electronic Payments	<p>For dishonored checks or money orders received after May 25, 2007, and prior to July 2, 2010, the bad check penalty was only applicable to paper checks and money orders. The penalty was two percent (2%) of the amount of the dishonored payment, or if the amount of the dishonored payment was less than \$1,250, then the penalty was the lesser of \$25 or the amount of the payment. Penalties were not assessed on checks less than \$5.00. See IRM 20.1.10 <i>Miscellaneous Penalties</i>.</p>
Failure to File a Timely and/or Complete Form 1065 IRC § 6698	<p>For returns due before 12/21/2007, the penalty is \$50 per person (as defined in IRC 7701(a)(1)) who was a partner in the partnership at any time during the year, for each month or part of a month the return is late or incomplete, for up to 5 months.</p> <p>For returns due after 12/20/2007 but before 1/1/2009, the penalty is \$85 per person who was a partner in the partnership at any time during the year, for each month or part of a month the return is late or incomplete, for up to 12 months.</p>

6 Return Preparer Penalties

Form 8278 is an adjustment document (ADJ54) used for assessments or abatements of return preparer penalties and other miscellaneous civil penalties that are not subject to deficiency procedures. The Penalty Reference Numbers (PRN) is keyed in with a positive dollar amount for assessments. A Transaction Code (TC) 290 posts with a TC 240 for the assessed amount. Preparer penalties are assessed on the tax period of the return in violation. Use MFT 55 for violations by an individual tax return preparer and for violations by a firm tax return preparer use MFT 13. Tax return preparer penalty PRNs are listed below. See IRM 20.1.6 *Preparer/Promoter/Material Advisor Penalties* for additional information.

The SBJA of 2010 also increases the IRC section 6722(a) penalties from \$50 to \$100 for failure to timely furnish accurate payee statements. IRC section 6722(d) adds lower limitations for gross receipts of \$5 million or less. The calendar year maximum for these penalties for large businesses increases from \$100,000 to \$1.5 million. These changes apply to returns required to be filed on or after Jan. 1, 2011.

8 Penalty Reference Numbers – Miscellaneous Civil Penalties

Penalty Reference Numbers (PRN) are used to assess and abate miscellaneous civil penalties. Some civil penalties are assessed and abated with their respective PRN or Transaction Code (TC) (generally, not TC 240/241) using Forms 5344, 5403, 3870 or similar closing and adjustment documents.

Form 8278, *Assessment and Abatement of Miscellaneous Civil Penalties*, is used to assess or abate civil penalties on MFT 13 (BMF) and MFT 55 (IMF) accounts. See Form 8278 instructions for additional PRN information at the following IRS web site:

CAUTION: The following PRN table reflects the most current penalties for the respective Internal Revenue Code sections. Archived PRN information, plus more information about PRNs, civil penalties, and return-related penalties are available through the following Office of Servicewide Penalties, IRS web site:

9 Penalty Reason Codes (PRC)

Any line marked with # is for official use only

When a penalty is manually reduced, abated, or suppressed, a Penalty Reason Code (PRC) is required to be input with the penalty adjustment to indicate why the penalty is being reduced, abated, or suppressed. A PRC is input to the fourth RC position.

Document Code 54 (TC29X) — enter the appropriate PRC (for example 022, 024, 025, 026, or 030) in RC position four of ADJ54 when Reason Code 062 is used in RC position one. Do not use RC 062 in combination with any of the other PRC in RC position four (see exception for PRCs 018/020 in IRM 20.1.1.3.6.1(7)).

Document Code 47 (AIMS Adjustment) — A PRC is a required entry for abatement or suppression of penalties, TC 161, 171, 181, 201, 235, 241, 271, 281, 311, 321, 351 and Penalty Reference Numbers (Negative amounts only). The PRC may be entered for input with TC 300, 304 and 308. Enter the appropriate PRC on Form 5344, Form 5581, 5599 and 5650 in item #02 of AMCLS.

Refer to IRM 20.1.1.5.1, *Master File Penalty Reason Codes*, and IRM Exhibit 20.1.1-3, *Penalty Reason Code (PRC) Chart* for detailed information.

(3) Glossary of Terms for Employment Taxes

Term	Definition or Example
------	-----------------------

<p>Lookback Period - Is a period of historical return filing(s) used to determine which deposit schedule a taxpayer must follow when making current year payroll tax deposits.</p>	<p>For quarterly returns: the total original employment tax liabilities from tax periods between July 1 and June 30.</p>	<p>For annual returns: the total original employment tax liability from the second previous tax return period.</p>
<p>Monthly or Semi-weekly Deposit Schedule - The schedule an employer follows to determine the length of the deposit period over which liabilities are accumulated and when the deposit is due. Refer to IRM 20.1.4.8.2.</p>		
<p>Deposit Period</p>	<p>for taxpayers following a monthly deposit schedule, the deposit period covers:</p> <p>a calendar month</p>	<p>for taxpayers following a semi-weekly deposit schedule, the deposit period is either:</p> <p>Sat., Sun., Mon. & Tues. *****OR***** Wed., Thur. and Friday</p>
<p>Accumulated Liability - The sum of tax liabilities from each individual payroll(s) within a deposit period. The amount that must be deposited. (Also referred to as Deposit Liability).</p>		
<p>Business Day - Deposits are due only on business days. A business day is every calendar day that is not a Saturday, Sunday, or legal holiday under IRC section 7503. Additionally, the term "legal holiday" for FTD purposes includes only those legal holidays in the District of Columbia. The following days are currently legal holidays in the District of Columbia: New Year's Day, Birthday of Martin Luther King, Jr., Washington's Birthday, District of Columbia Emancipation Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day, and the day of the inauguration of the President, every fourth year.</p>		
<p>Safe Harbor - Use of the safe harbor rules has been expanded to all depositors. An employer is required to deposit 100% of the deposit liability on or before the deposit due date. Regulations provide a safe harbor, (safety net option) if the employer cannot deposit the full amount required. An employer will still be considered to have met their deposit obligation if the underpayment/shortfall (the difference between the required deposit liability amount and the actual amount of the deposit) is less than the greater of \$100 or 2% of the required deposit. The shortfall is treated as a new, unique, separate liability, arising from its own separate deposit period and carrying its own deposit due date. The shortfall due date is determined by the deposit schedule followed.</p>		
<p>De Minimis Rule - Employers handling payroll taxes are required to deposit those monies. Failure to deposit in the correct manner will subject the employer to a FTD penalty equal to 10% of the amount incorrectly submitted. However, under the de minimis exception an employer may be relieved of the burden of making deposits and may submit a check (to the IRS) for the full amount of the tax liability with their return without incurring an FTD (failure to deposit in the correct manner) penalty if the following criteria is met:</p> <ul style="list-style-type: none"> • Annual filers with a total return liability of less than \$2,500. <p>Quarterly Form 941 filers with a total return liability of less than \$2,500 in the current quarter or a total return liability of less than \$2,500 in the previous quarter, with NO \$100,000 next-day deposit obligation in the current quarter. For de minimis thresholds (including prior years) see IRM 20.1.4.6.</p>		
<p>Application of Payments (FIFO) - Credits are ordered by the date received. Multiple credits of the same transaction code received the same date are combined into one credit amount. Valid credits include TC 610, 650, 670, 700, 760, 710, 716 and 766 with CRN 296 and 299.</p>		
<p>Liabilities are ordered by the due dates. Multiple liabilities arising from the same deposit period are combined into one liability. Multiple liabilities, from various deposit periods, with the same due date are further ordered by their incurred date.</p>		
<p>For periods after December 31, 2001, deposits are applied to the most recently ended deposit period or periods within the specified tax period to which the deposit relates as provided for in Rev. Proc. 2001-58. The application of deposits to the most recently ended deposit period will, in some cases, prevent the cascading penalties where a depositor either fails to make deposits or makes late deposits. See the job aid on the "Most Recent Payment Allocation Method" located in SERP Job Aids Accounts Management, IRM 21.7</p>		

(4) Penalty Computation Codes (PCC)

Any line marked with # is for official use only

The following PCCs are associated with the FTD Penalty and used to describe the reason(s) why the FTD penalty was assessed. See Section 8.16(4) *BMF Reason Codes/Penalty Computation Code* in this *IRS Processing Code and Information, Document 6209* for detailed information.

Transaction Code (TC)	Return with Good ROFTL Information	Return with Invalid or No ROFTL	Returns using monthly ROFTL instead of daily ROFTL
All *good TC 650	PCC 003	PCC 011/057***	PCC 054/057***
All TC 670 and/or **bad TC 650	PCC 041	PCC 043/057***	PCC 055/057***
Mix of TC 610, *good 650 and **bad 650 and 670	PCC 042	PCC 044/ 057***	PCC 056/ 057***
<p>*good TC 650 is a deposit made as required: by coupon through an authorized depository or in the case of a mandated taxpayer, a deposit made via EFT.</p> <p>**bad TC 650 is a non-EFT deposit made by mandate (taxpayer required to deposit electronically prior to 01-01-2011).</p> <p>*** If averaged monthly tax liability is over \$100,000, use PCC 057.</p>			

A PCC generating with a TC 186 is used to explain why Master File computed a penalty on the account. A PCC also dictates which penalty explanation language is printed on balance due notices.

A PCC is also required with the input of a manual TC 180 penalty assessment to explain why the penalty was assessed. Indicating the computation method used will continue the processing audit trail and reduce the need to request previous case files when responding to incoming correspondence or calculating subsequent adjustments. See IRM 2.4, *IDRS Terminal Input*, for input instructions for the PCCs.

When using Reason Code (RC) 062, the reasonable cause indicator is not affected by the input of the above codes and still must be input whenever reasonable cause applies. It may be used alone (for abatements) or with any of the above codes when reasonable cause is being denied and a penalty is manually assessed. RC 062 is entered in the first RC position; the applicable penalty reason code must be entered in the fourth RC position.

(5) Schedule Indicator Codes (SIC)

A SIC 2 or 3 coded on the return during the return processing will prevent Master File from determining a penalty amount. Instead, Master File generates CP 194 Possible FTD Penalty Notice. The Campus manually reviews all CP 194 accounts.

The SIC applicable to FTD penalty processing are as follows:

SIC	199212 & prior	199312	199412 thru 200512	200512 & subsequent

TDA/TDI Assignment Codes (TSIGN Codes)

TDA/TDI Assignment Codes. This eight-digit code identifies the area office, territory, branch, group and employee or special action code to which TDAs and TDIs are assigned. The assignment number is used by all systems that process Collection work including IDRS (DIAL, DAIP, TDA, TDI, IDRS SUMRY, TXMOD), ICS, ACS, ENTITY and other listings/systems, which the TDA/TDI assignment number controls inventory. Although the designation of simply "group" is commonly used for the 5th and 6th digits, many TSIGN rules still separate and distinguish Branch (5th digit) and group (6th digit) for certain processes.

An eight-digit Assignment Code (TSIGN) is formed as follows:

3 Resource and Workload Management System (RWMS)

The Resource and Workload Management System (RWMS) was a Collection case scoring and ordering system intended to have a meaningful impact on Collection case processing. The case scoring formula is now done in Weekly TIF Update (WTU).

4 Automated Collection System (ACS)

ACS is a computerized inventory system which maintains balance due accounts and return delinquency investigations. A call site has an Automated Collection Branch (ACB) under the Chief, Collection Division of the call site district. Inventory is divided among teams using the last two digits of the Taxpayer Identification Number (TIN). Team inventory is divided into one of four functions, with each function having 10 units to act as holding bins for ACS accounts awaiting action. The four functions are:

- (1) Contact (C) handles taxpayer telephone calls;

Code	Explanation	Comment
A	Account generally meets one of the following conditions: <ol style="list-style-type: none"> 1. The module is big delinquency checked has credit balance of \$500 or more. 2. The entity has another module in Status 3, 22, 24, 26, or a module with the same MFT in Status 2 (but not o2B). 3. The total tax liability of the last return filed for the same MFT is a least \$500. 	The “A” code case will have the fourth notice issued 10 weeks after the first notice is issued followed by a TDI 10 weeks later.
B	Indicates the delinquency met the criteria for the TDI Suppression Program.	IMF: The “B” code shows that a 2nd CP 516 notice will be issued. BMF: The “B” code shows that only one notice will be issued.
E	A TC 148 with Entity Indicator 4 has been input to identify a W-4 Civil Penalty Case.	The “E” coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI four weeks later.

The "Q" coded TDI results when an employee inputs this request. Subsequently, a fourth notice will be issued three weeks after the first notice followed by a TDI six weeks later.
R*	Indicates at least one TDI or TDA was closed during the past twelve months.	The "R" code indicates a TP has had prior delinquencies. Every effort should be made to bring these repeater TP's current and to encourage future compliance.

X	Total liability shown on the latest return posted for the same type of tax (MFT 01, 03, 09 or 11) was 5,000 or more. This applies to the Last Period Satisfied for the same MFT as the delinquent tax period.	The "X" coded cases indicates a high priority TDI and will be issued five weeks after the first notice. These TDIs should be completed in the shortest possible time period. Often these accounts pertain to trust fund liabilities.

7 IRP Selection Criteria Codes

Reference IRM 5.19.2

The filing requirement for an individual liable for Self-Employment Compensation Act Tax is \$400 or more of net income. Since the current income tax return filing requirement has increased, many individuals who are liable for the SE tax may be inclined to overlook the \$400 filing requirement and believe that they are exempt from the requirement to file. Therefore, the TDI Supplement may be referenced for indications of past payments of SE tax as a basis for interrogating the taxpayer about liability for SE Tax. Certain Selection codes may reflect self employment tax information from the preceding year's tax returns.

The following is a list of the Collection Case Selection Criteria Codes. The return delinquency may include IRP documents in addition to those described in the "Criteria for Selection Code" column.

Effective 1/1/2002, TC 520 Closing Codes 86, 87, 88, and 89 will not be available for new inputs. Open cases that already have these closing codes will remain operational until they are reversed.

*Frozen from Master File offsets (in out), refund, or credit elect.

**Frozen from releasing IDRS balance due notice or TDA.

***Effective 1/19/91, a TC 521 input with a bankruptcy indicator 999 will reverse all open TC 520 CC 81 or 85 thru 89 within the module.

****If the TC 520 CC 76 or 77 posted before cycle 200101, then it must be reversed using TC 521 without a closing code.

The 6X Series cannot be input with a transaction date prior to January 1, 1995.

Closing Codes 60-63 only allows post petition credits to offset to post petition tax years and Closing Code 62 and 63 will freeze remaining credit after offset.

Closing Codes 64 - 67 allow pre-petition credits to offset to pre-petition tax years and allows post petition credits to offset to post petition tax years and Closing Codes 66 and 67 will freeze remaining credit after offset.

Closing Codes 60, 62, 64 and 66 allow post petition tax years to go to IDRS balance due notice or TDA.

When TC 520 CC 83, 85, through 89 is input a three-digit indicator is also input signifying proceeding type, claim type and whether an installment plan is involved. Closing code used to input the three digit indicator should be the same as the current open closing code. The indicator codes are:

First digit representing the type of proceeding—

- 1 for Chapter 7
- 2 for Chapter 9
- 3 for Chapter 11
- 4 for Chapter 13
- 5 for Chapter 12
- 8 for Other Insolvency

Second digit representing the type of claim—

- 1 for Secured
- 2 for Unsecured priority
- 3 for General unsecured
- 4 for Administrator
- 5 for Involuntary Gap

Third digit representing installment plan of arrangement—

- 0 if installment plan is not anticipated
- 1 if installment plan is probable.

IMF/BMF changes due to Bankruptcy Abuse Prevention & Consumer Protection Act (BAPCPA) — Effective January 2006

Allows 3 digit SI when TC 521 CC 83, 85 through 89, or CC 60-67 are input. The three-digit indicator identifies proceeding type, disposition to identify dismissal/discharge type for subsequent bankruptcy filings automatic stay in effect and whether a plan applicable or plan satisfied. Closing code used to input the three-digit indicator should be the same as the current open closing code. The indicator codes are:

First digit representing the type of proceeding—

- 1 for Chapter 7
- 2 for Chapter 9
- 3 for Chapter 11
- 4 for Chapter 13
- 5 for Chapter 12

Second digit representing the type of dismissal/discharge—

- 1 means dismissal abusive or otherwise (This equals D1 on Automated Insolvency System (AIS))
- 2 for failure to pass means testing (This equals D2 on AIS)
- 3 for Discharge
- 4 Reserved for future definition
- 5 Reserved for future definition

Third digit representing installment plan of arrangement—

- 0 plan not applicable
- 1 plan satisfied

Any line marked with # is for official use only

on TXMOD and all Master File IDRS output, and on the Automated Collection Systems (ACS) to reflect the taxpayer's status. The statuses are*:

- 2 = Subject to BWH
- 4 = BWH Satisfied
- 8 = Suspended
- M = Multiple Periods

*Backup withholding under IRC 3406(a)(1)(B) for missing and or incorrect TINs will not show on IDRS.

10 Designated Payment Codes (DPC)

Designated Payment Codes (DPC) are two digit codes which serve a three-fold purpose. Use of a DPC on all posting vouchers is now mandatory with Transaction Codes 640, 670, 680, 694, 690, and 700. DPCs are used to:

- (a) Facilitate identification of payments which are designated to trust fund or non-trust fund employment taxes. In such cases, they are input with payments to Form 941 (MFT 01), Form 720 (MFT 03), Form CT-1 (MFT 09), Form 943 (MFT 11), and Form 1042 (MFT 12).
- (b) Indicate application of a payment to a specific liability when the civil penalty contains both a Trust Fund Recovery penalty and any other type of civil penalty. In these cases, they are input to MFT 55 only.
- (c) Identify the event which resulted in a payment. This is done at the time that a payment is processed and may be used with any MFT to which the payment transaction code will post. Data from this type of input is accumulated on a national basis to determine the revenue effectiveness of specific collection activities.

DPCs and their definitions are:

11 Generated Reports**(1) Currently Not Collectible Accounts Register**

General Description—Daily Transaction Register (DTRs) will not be received on accounts reported currently not collectible. Semi-annually, in March and August, a Currently Not Collectible Accounts Register of Master File Accounts will be issued for each area office.

(2) Collection Activity Report (CAR)

CAR is a group of IDRS reports providing management information to field and National Office Collection officials. The reports will reflect activity associated with TDA and TDI issuances and installment agreements including issuances, dispositions and inventories as well as Collection related payments. CAR utilizes the TIF as its source of information.

12 Delinquent Investigations/Account Listing and Delinquent Account Inventory Profile

The two reports, the Delinquent Investigation/Account Listing (DIAL) and Delinquent Account Inventory Profile (DAIP), are provided to facilitate the monitoring and control of TDA and TDI inventories.

The DIAL is issued monthly for hardcopy assignments, i.e. TDAs and TDIs assigned to the Field Collection (FC), and for certain other non-ACS assignments. It provides information about cases in assigned inventory, such as the grade level of assignments, the date of initial assignment and the date of assignment to the current responsibility unit, which were previously provided on the DAIP and the Delinquent Investigation Inventory Profile (DIIP). It identifies assignments which meet established criteria for large dollar, overage, no activity, CSED and ASSED analyses. A review of the DIAL will provide Field Collection managers with a comprehensive profile of each case under their control.

The DAIP is a quarterly listing of TDA cases in statuses other than status 26 which meet either not activity or CSED criteria.

13 FTD Alerts

FTD Alerts generate on MFT 01 modules when the quarter deposits are significantly below what is expected based on a comparison with the same quarter in the prior year. Masterfile conducts the analysis for FTD Alert issuance in the twelfth cycle of the quarter.

When an FTD Alert generates, it is assigned a value of 1 through 3. The values reflect criteria under which the Alert was generated.

Subsequently, priority code values are set according to the following conditions:

1. The taxpayer had an unresolved account in notice status in each of the prior two quarters. A priority code 'A' is assigned.
2. The taxpayer is considered likely to owe without intervention based on our identification and selection process. A priority code 'B' is assigned.
3. The taxpayer is considered unlikely to owe. A priority code 'C' is assigned.

FTD Alerts having priority codes 'A' or 'B' are required to be assigned to revenue officers. Those Alerts assigned priority code 'C' are dropped by ICS and are not worked by revenue officers.

CP 196 is issued by the Primary Program and a TC 971 AC 46 is placed on each module (including those Alerts assigned priority code 'C'). Alerts are issued through masterfile and are sent to ICS for direct assignment to the field.

2 Discriminate Function (DIF)

Discriminate Function (DIF) is a mathematical technique used to classify income tax returns as to Examination potential.

Under this concept, formulas are developed based on available data and are programmed into the computer to classify returns by assigning weights to certain basic return characteristics. These weights are added together to obtain a composite score for each return processed. This score is used to rank the returns in numerical sequence (highest to lowest). The higher the score, the higher the probability of significant tax change. The highest scored returns are made available to Examination upon request.

The DIF-system involves computer classification to mathematically determine the Examination potential of returns, and manual screening to set the scope of examinations and to select needed workload.

3 PCS – Partnership Control System

Reference IRM 4.29, Partnership Control System (PCS) Handbook, and 2.2, Partnership Control System.

PCS is a real-time system that establishes, links, and controls flow-through returns and their investors. It interfaces with AIMS, Master File and the TIF.

PCS identifies returns subject to TEFRA examination procedures; controls TEFRA and non-TEFRA statutes; generates required statutory correspondence for TEFRA investors including the Notice of Beginning of an Administrative Proceeding (NBAP), 60-Day Letter, FPAA/FSAA, and Appeals settlement correspondence. PCS produces National directories, data base maintenance reports, statute reports, action reports, and management information reports.

PCS has eight command codes which are input real-time:

TSLOD	Establishes and links returns on PCS, generates NBAP'S, requests returns from Master File, and establishes TC424's on AIMS. Each time a new link is established, TC424 will be generated to post to Master File. If there is already an open TC 420 at Master File, a TC 421 with DC 99 will be generated and then the TSLOD TC 424 will post. IRM Reference 2.2.2
TSCHG	Changes PICF data elements. IRM Reference 2.2.3
TSCLS	Releases the AIMS freeze on investor closure. It is used only as a part of final investor AIMS closure activity. IRM Reference 2.2.7
TSDEL	Deletes erroneous linkages. IRM Reference 2.2.5
TSINQ	Researches accounts on PCS displaying PICF, and AIMS information. IRM Reference 2.2.4
TSNOT	Key case records for generation of TEFRA notices during real-time, but notices are generated after weekly batch processing. IRM Reference 2.2.6
TSUMY	Displays summarized research for linked key case and their investors. IRM Reference 2.2.9
MSCHG	Changes certain PICF/AIMS data elements of all investors linked to a particular key case. The command code is input real-time, but the update is performed via batch processing for all affected accounts. IRM Reference 2.2.8

PCS uses real-time processing to update the PICF when establishments and updates are made on the IDRS terminal.

Any line marked with # is for official use only

Only MSCHG and TSNOT are processed in the batch mode.

Nightly batch processing includes: updating records nationwide, maintaining the PCS data base, and producing error registers.

Weekly batch processing includes: generating extracts for PCS reports, and notices.

Partnership Investor Control File (PICF) Codes

0	No PICF record for this account
1	Linked TEFRA Partnership
2	Linked non-TEFRA Partnership/S Corporation
3	Unlinked Electing Large Partnership (ELP)
4	Investor with both open TEFRA linkage and open non-TEFRA linkage
5	Investor with at least one open TEFRA linkage
6	Investor with at least one open non-TEFRA linkage
7	Investor with no open linkages below it (flow thru)
8	Investor with no open linkages below it (flow thru)

4 ERCS – Examination Return Control System

Reference IRM Part 4, Examining Process, IRM 4.7, Examination Returns Control System (ERCS)

ERCS is an automated inventory management system used by field personnel in both the SB/SE and LB&I Operating Divisions. It is used for controlling tax returns and technical time charges from the time returns arrive until they are closed on the Audit Information Management System (AIMS). TE/GE and Appeals do not use ERCS.

5 Audit Information Management System (AIMS)

(1) General

Audit Information Management File (AIMF) contains all data elements used by the AIMS System. These data elements are described separately in IRM's 4.4 and 2.8, Audit Information Management Systems (AIMS).

TE/GE and Appeals use the system to control their cases.

The AIMS command codes which authorize the terminal operator to input or receive information to or from the system are found in IRM 2.8.

(2) AIMS Website

The AIMS Website can be found at: <http://mysbse.web.irs.gov/exam/mis/default.aspx>. The AIMS website contains up to date lists of many of the fields on AIMS such as Aging Reason Codes, Disposal Codes, Employee Group Code definitions, Source Codes, etc.

(3) AIMS Assignee Code

A twelve-digit code used for the management structure so that returns and time applied to returns can be applied to the correct location (Business Operating Division) for management information reports. The AIMS Assignee Code (ACC) is displayed on page 1 of an AMDISA print and Form 5546, Charge Out. The code is broken down into three fields.

Field 1: Primary Business Code consists of 3 digits (Positions 1 - 3). Position 1 is referred to as the "AIMS BOD Code":

- 0 = Not set
- 1 = Wage and Investment (WI)
- 2 = Small Business/Self-Employed (SB)
- 3 = Large and Mid-Sized Business (LM)

Any line marked with # is for official use only

4 = Tax Exempt/Government Entity (TE)

Positions 2 and 3 are referred to as "IND-AREA-TYPE-CODE".

Field 2: Secondary Business Code consists of 5 digits (Positions 4 - 8). (See below for breakdown by Operating Division)

Field 3: Employee Group Code consists of 4 digits (Positions 9 -12). Position 9 is referred to as "EMPLOYEE-TYPE-CODE":

1 = Revenue Agent
2 = Tax Compliance Officer
5 = Campus
7 = TE/GE

Positions 10 - 12 are referred to as "GROUP-CODE".

Field 1 Primary Business Code			Field 2 Secondary Business Code					Field 3 Employee Group Code

(a) Examined Disposal Codes

Code Definition

- 01 **No Change With Adjustments**—(01 is considered agreed on the AIMS tables). Applies to no-change examined returns (even if a 30-day letter was issued) if there is an adjustment to the tax base data such as income or deduction items but no change in tax liability or refundable credits; or tax changes fell below the tolerance level in LEM IV. An audit report must accompany the case file. Note: An audit report is not required for most cases closed below the tax tolerance in the Campus TEFRA Function (CTF). An exception will be when the tax changes impact a prior or subsequent tax year (NOL, PAL, etc), or other adjustment years are above the tax tolerance. Item 41 is required if MFT = 30. The following are examples of no-change with adjustments examinations:
- a. Delinquent returns secured by the examiner, accepted as filed and forwarded to the campus for processing. This includes delinquent return pickups that result in a zero tax liability. If the TC 424 posted prior to the posting of the delinquent return, enter the balance due or refund amount, excluding penalties in Form 5344, Item 414. If an SFR has been processed the amounts from the secured return must be input through AIMS therefore DC 01 does not apply.
 - b. Claims disallowed in full. (Agreed or not agreed)
 - c. Income tax examination when taxpayers are issued an examination report Form 4549 and Letter 1156. (see IRM 4.10)
 - d. Flow through entities where no changes are made to the entities reported income, loss, deductions or credits reflected on the return or the owner(s) K-1 and (1) a delinquent return secured by examination, or (2) a balance sheet item is adjusted, or (3) a related return is adjusted as a result of the flow through examination (i.e. – adjustments to basis, at risk, or passive activity rules, taxable loan repayments or distributions, or adjustments to include the amount reported to the owner's K-1).
 - e. Estate or gift tax cases when offsetting adjustments result in no change in tax liability. This includes gift tax cases when Letter 942 (C) is issued to taxpayers (See IRM 4.10).
 - f. Excise, trusts and estates, or employment tax cases when offsetting adjustments to tax base data and/or credits result in no change in tax liability.
 - g. Disqualified 1120 DISC(obsoleted)/IC-DISC election.
 - h. Non-TEFRA (nontaxable) Flow through Entities - no change with adjustments should be utilized when no changes are made to the entity's ordinary income or loss or separately stated items reflected on the return or Schedule K-1 and an owner's return is adjusted as a result of the flow through examination. This would include: adjustments to basis, at-risk or passive activity rules: taxable loan repayments; adjusting the owner's return to match the K-1 flow through amount(s).
 - i. TEFRA (nontaxable) Flow through Key Case Entities - Does not apply.
- 02 **No change**— (02 is considered no change on the AIMS tables) - Applies to Examination which do not necessitate the issuance of a report (other than the no-change report subject to area director's approval)
- a. Taxable return — there were no adjustments or no changes in tax liability for this return to: Tax, penalties, or refundable credits. This disposal code would also apply to changes only affecting the balance sheet, including constructive dividend issues, and any other related return pick-ups where there was no tax liability adjustment to this return. Item 41 is required if MFT = 30. Block 405 & 408 of Form 5344 should be completed as appropriate.
 - b. Flow through entities — no exam changes are made to the entities reported income, loss, deductions or credits reflected on the return or Schedule(s) K-1. (See DC 01 where adjustments are made to a related return.) Applies to TEFRA returns closed within 45 calendar days (including weekends and holidays) from the date the NBAP is issued to the TMP as well as those closed no change after 45 days where a no change FPAA is issued...
 - c. Non-TEFRA (nontaxable) Flow through Entities should be utilized when the examination results in no changes to the entity or any owner. This would also be appropriate if you make adjustments to one of the owner's returns as a result of compliance checks which are not related to the entity examination.
 - d. Not valid with an Amount Claimed on the data base.
- 03 **Agreed**— (03 is considered agreed on the AIMS tables) – Applies only to returns if an agreement is received prior to the issuance of a 30-day or 60-day letter. EGC's 5XXX will not use DC 03 for agreements as their first contact with the TP is the 30-day letter. Also applies to claims allowed in full. EGC 2XXX: ALL agreed income tax cases closing from office examination will use Disposal Code 03 regardless of whether a Letter 915, Letter to Transmit Examination Report has been issued. EGC 5XXX: .Non-TEFRA (nontaxable) Flow through Entities: Applies to an agreed case if an agreement is obtained from all owners. If all signatures are received from the owners, you can close the case indicating on the entity

Code Definition

report that agreement has been obtained from the owners. TEFRA (nontaxable) Flow through Key Case Entities: applies to an agreed case that will result in partner adjustments and an agreement is obtained from all partners, or an agreement from the partnership which binds all partners. If the net TEFRA partnership adjustments are zero, but the adjustments will result in taxable adjustments to the partners, close DC 03 with -\$1 entered in item 34 on the Form 5344. (If agreements are received as a result of a no change FPAA, close DC 02.)

- 04 **Agreed**— (04 is considered agreed on the AIMS tables) Applies only to returns if an agreement is received after the issuance of a 30-day or 60-day letter.  502 Settlement Amount Per Computer—Balance due or refund shown on Master File. (Balance due indicated by an asterisk (*)).
 503 Math Error (Includes adjustments to credits)—The difference between balance due or refund per computer (502 above) and balance due or refund per return.
 506 Delinquency Penalty - Amount of delinquency penalty determined by computer.

(14) Freeze Codes

A freeze can be placed on AIMS to prevent closing and/or updating a specific account.

Codes A - P, V, W, Y and 1-9 prevent closing.

Codes Q-T, prevent closing and updating. Updating (Q will not block a docketed (DC 11) closure to Appeals – freeze will be removed systemically.

Code U prevents closing if TC 300 contains a positive dollar amount. Otherwise it will allow a closure.

Code X prevents closing if TC 300 is positive unless disposal code is agreed.

Codes H will prevent AMCLS unless item 16, Appeals Office Code, is present.

A-G, I-J, L, Q-S, V and W prevent transfers (AMSOC DC 30).

Definitions of freeze codes are found in IRM 4.4.1, Exhibit 5 and on the AIMS web site at:

3 Closing Codes for Appeals

A two-digit "closing code" must be input to AIMS via CC AMCLSA on each AIMS case closed by Appeals. The closing code is input from Form 5403. (Appeals' AIMS closing code is similar to Exam and TE/GE's AIMS Disposal code).

6 TE/GE Reporting Systems Codes

EP/EO Determination System (EDS)

EDS is an inventory control and letter generation system for Exempt Organizations (EO) and Employee Plans (EP) determination letter applications. Organizations and plan sponsors submit applications to EO or EP to determine if they meet the law requirements of the Internal Revenue Code. Data entered is added to the Inventory Control System (ICS). This information allows EP and EO to manage their workload, generate correspondence (usually a favorable determination letter), and to add the applicant to the EO/BMF or EPMF.

Before the applicant is added to the EO/BMF or EPMF, the data entered must be validated by MPS (campus subsystem). Once the data passes the validity checks it is added to the campus database files to wait for the weekly posting cycle to Master File and the monthly extract to DCC.

Database Files of MPS

Any line marked with # is for official use only

PCCF — The Plan Case Control File contains the plan characteristics, entity information, filing requirements and the final disposition of each application. The data on the PCCF can be accessed via the unique case number and file source generated by CSS.

POIF — The Plan/Organization Index File is an abbreviated record of the PCCF. The POIF is used to retrieve the case number when only limited data such as the File Folder Number, EIN, Name Control and on EP Cases, Plan Number is available.

The EP and EO data is stored in one database file. EP and EO cases are identified by a file source. File Sources are:

- EP — Employee Plan Case
- EO — Exempt Organization Case

Two types of records are added to the PCCF: an opening record and a closing record. The opening record will be in status 51 — Area Office Receipt and will stay in that status until the closing record is added. The closing record is sent to ECC-DCC and the master files. Command codes are available for research through IDRS. These command codes are:

PLINF — Displays specific information from the PCCF. The case number must be used with the file source EP or EO to display the data. If the case number is unknown the command code PLINQ may be used to obtain it.

PLINF with a definer of "blank" will display the history of status 51 and the final closing. PLINF with definer E will display the complete entity data.

PLINQ — Accesses one or more records from the POIF based on the search data entered. The case number is obtained to be used with PLINF. PLINQ without a definer searches for EP records and a definer of "O" searches for EO records.

For complete details on the subsystems of EDS in the area office, refer to IRM 7.14, EP/EO Determination System (EDS) Employee Plans User Manual or IRM 7.22, EP/EO Determination System (EDS) Exempt Organizations User Manual.

Beginning in 2010, check the EFAST website at www.efast.dol.gov for information on filing and appropriate addresses.

(2) EPMF Delinquency Investigations

EPMF delinquency investigations are also processed through IDRS. IDRS will issue notices and TDI's, generate transactions to record fact of notice/TDI issuance for each module, and monitor closures by TC 150, 59X or 977. EPMF delinquency investigations may be initiated with Form 4864 (Request for Delinquency Notice or TDI).

(13) EP AIMS Push Codes

- 020 — Delinquent Return 5330/940/941/945/1040/1041/1065
- 021 — Substitute 5330
- 025 — Inadequate Records Notice
- 036 — Substitute for Return
- 041 — Current Return Pick-up
- 081 — Future Year Return

When a request is made through AIMS to post a transaction code, TC424, to the Master File (BMF, IMF, EPMF), if the Master file does not reflect the posting of the return (TC150), entering a Push Code from the above list, with the exclusion of Push Code 036, on the Form 5597 will post the TC 424 and 3 digit Push Code on AIMS and MF. The Push Code will allow the skeletal AIMS account (TC424) to remain active and will hold at MF for up to 26 months. If the return (TC 150) does not post on MF within that time frame, then the TC 424 will reverse shutting down the AIMS account and posting the closing on MF (TC421). If the return posts in the interim, an AIMS opening will automatically be generated, be extracted and a good AIMS account (TC420) will appear.

Note: Using a Push Code 036 will automatically generate a TC 150 and TC 420 on Master File, Push Code 036 can be used for all MFT's except for MFT 74 and 76.

(3) Status Codes - Master File and AIMS

These codes are used to reflect the current (and possibly the past) rating of an account. Both Master File and AIMS status codes are listed and defined below.

It should be noted, that any similarity between the value or definition of these two sets of codes is purely coincidental. Master File Status Codes for Exempt Organizations are used to define the rating of the organization as to its qualifications under specified Internal Revenue Code Sections, whereas, AIMS Status Codes are used to identify a specific type of EO return (MFT and Tax Period) of an organization that has been

controlled for reporting purposes into the Examination Stream.

Section 14 - Integrated Data Retrieval System (IDRS)

1 Nature of Changes

Description	Page No.
Deleted obsolete information from Subsection 2(3)	14-1
New Category Codes	14-6

2 Summary of IDRS

Reference Handbooks 2.3 and 2.4

The Integrated Data Retrieval System (IDRS) is a system which enables employees in the Campuses and the Area Offices to have instantaneous visual access to certain taxpayer accounts.

Some capabilities of the system include:

- Researching account information and requesting returns.
- Entering transactions such as adjustments, entity changes, etc.
- Entering collection information for storage and processing in the system.
- Automatically generating notices, collection documents and other outputs.

Several different files compose the IDRS data base. Some of them are:

- (1) **AUDIT INFORMATION MANAGEMENT SYSTEM (AIMS)**—This file is a computer system designed to give Examination Division information about the returns open to Examination.
- (2) **ADOPTION TAXPAYER IDENTIFICATION NUMBER (ATIN)** - This file contains W-7A application information regarding pending adoptions. A temporary number is assigned to the child so that adoptive parents can claim dependency exemption and child care credit. All update processing will take place at the Austin Campus. Command Code ATINQ is available for universal access inquiries at all Campuses. (IRM Handbook 2.3 Chapter 79)
- (3) **CENTRALIZED AUTHORIZATION FILE (CAF) RESEARCH**—The Centralized Authorization File contains information regarding the type of authorization that taxpayers have given representatives for various modules within their accounts. This information is used to direct refunds and/or copies of notices and correspondence to representatives when this has been authorized. It can also be used to determine whether an individual claiming to be a representative (Rep) of a taxpayer is, in fact, authorized to represent or act in the taxpayer's behalf, or to receive the information requested. The command codes available for research are: (a) CC CFINK IRM Handbook 2.3 Chapter 31, and (b) CC RPINK IRM 2.3 Chapter 31.

Note: The service center CAF databases were consolidated in July 2001. Then the CAF was converted to DB2 format in March 2003. There is only one CAF, maintained on the master file IBM. All command code inquiries and updates process against that file.

- (4) **DISHONORED CHECK FILE (DCF)**—This file contains a record of the dishonored checks returned to the Campus by banks. The record will remain on the file until research positively identifies the tax module which was credited when the check was originally received. Once identified, an entry is made to the file which will cause a debit transaction to be generated and sent to the master file. A notice will also be generated to notify the taxpayer. Reference IRM 2.4 Chapter 25
- (5) **EXCESS COLLECTION FILE (XSF)**—This file contains two accounts, non-revenue receipt credits in Account

6800 (Excess Collections) and Account 9999 (Revenue Clearance Accountability). Each record within the file contains the control number, amount, source of the credit, IRS received date, status code, other available payment and follow up information. This file may be accessed with CC XSINQ. (IRM 2.3.49).

- (6) **Name Search Facility (NSF)** - The NSF provides a way for IRS employees to access a Taxpayer Identification Number (TIN) with the selected taxpayer's name and address, or vice-versa. NSF data is stored in a DB2 data base on the IBM, which is accessed by NSF command codes NAMES, NAMEE, NAMEI, NAMEB, FINDS, FINDE and TPIIP.
- (7) **IRS INDIVIDUAL TAXPAYER IDENTIFICATION NUMBER (ITIN)** - This file contains W-7 application information. The ITIN is a permanent number assigned to those individuals who do not qualify for Social Security numbers (SSN) but require a number for tax purposes. All update processing will take place at the Austin Campus.
- (8) **NATIONAL ACCOUNT PROFILE (NAP)**—The National Account Profile is maintained at the Martinsburg Computing Center. The Campuses and Area Offices have direct access to the NAP using CC INOLE.
- (9) **PREPARER TAX IDENTIFICATION NUMBER (PTIN)** - This file contains W-7P application information. The PTIN is a 9 character number assigned to tax return Preparers who choose to use the PTIN in lieu of their individual Social Security Number on those returns they prepare. All update processing will take place at the Brookhaven Campus. Command Code PTINQ is available for universal access inquires at all Post of Duties.
- (10) **REPORTING AGENTS FILE (RAF) RESEARCH**—The Reporting Agents File contains information regarding the type of authorization that taxpayers have given to their reporting agent for the employment tax/payment modules and/or the FTD payment modules in their account. This authorization allows the reporting agent to file the taxpayer's Form 940 or Form 941 on magnetic tape or make magnetic tape or electronically or make magnetic tape or electronic submission of federal tax deposits. The information from the authorization is used to direct copies of notices and correspondence to reporting agents if authorized. It can also be used to determine whether an individual claiming to be a reporting agent for a taxpayer is, in fact, authorized to receive the information requested.
- (11) **TAXPAYER INFORMATION FILE (TIF)**—The TIF provides tax account information for taxpayers selected for IDRS. The TIF is divided into three sub-groups as follows:
- ITIF—Individual Master File
 - BTIF—Business Master File
 - ZTIF—Individual Retirement Account, Employer Pension Plan, and Non-Master File.
 - Entity changes may be made using CCs ENREQ, INCHG, IRCHG, BNCHG, , BRCHG, EOREQ, and EOCHG. - See IRM 2.3 Chapter 9 for the instructions.
- (12) **UNIDENTIFIED REMITTANCE FILE (URF)**—This file contains an information record of each remittance which is received but cannot be positively identified. This file aids in resolving payment tracers.

3 IDRS Security System

A. Security Procedures

General

The IDRS Security System is designed to provide protection for both the taxpayer and the IDRS user employee. The taxpayer must be protected from unauthorized disclosure of information concerning his/her account and unauthorized changes to it. The IDRS user employee must be protected from other personnel using his/her identification to access or make changes to an account.

IRM 1.3, Disclosure of Official Information Handbook contains guidelines governing the release of data included on tax returns and other information contained in Service files.

Protection of Taxpayer Accounts

Employees should exercise special precautions to identify the taxpayer or his/her authorized representative when answering inquiries about a refund, notice, adjustment or delinquent account.

When responding to telephone inquiries and walk-in taxpayers about a tax account, the employee handling the inquiry should obtain:

- Taxpayer's name, address.
- Taxpayer Identification Number (SSN or EIN).
- Document Locator Number (DLN), date or amount on notice or other document received.
- Date and/or amount of refund, adjustment, payment or return.
- Type of notice or other communication received.

If a caller is unable to furnish enough information to establish that he/she actually is the taxpayer, the employee should request that the caller find out the information and call back. If the caller states he/she does not have the information and cannot obtain it, the employee should advise the caller to write.

Employees should not provide Taxpayer Identification Numbers over the telephone. Tele-Tin employees will follow their IRM guidelines.

Information concerning taxpayers will not be provided to third parties without written authorization from the taxpayer, even though the third party requesting the information has possession of a copy of the bill or notice in question.

Written authorization from the taxpayer is not restricted to a power of attorney or to any specific form. The authorization must bear the taxpayer's signature. If there is serious doubt whether the signature on the authorization is the taxpayer's, offer to mail the information to the taxpayer's address of record.

Authorized Access

IDRS users are authorized to access only those accounts required to accomplish their official duties. IRM 0735.1, Handbook for the Rules of Conduct, states that instances of employee's accessing their own (or spouse's) account or the account of another employee (or spouse) via IDRS will be treated as administrative offenses. In addition, IDRS users must not access the account of a friend or relative, or any account in which they have a personal or financial interest.

Passwords

Each IDRS user employee will be furnished a password on a periodic basis.

The employee is responsible for protecting his/her password. The password must not be revealed to anyone, regardless of his/her position in or outside the Internal Revenue Service.

Employees must never use another employee's password.

Any time a password is compromised, or even if an employee suspects that it has been, he/she will notify the System

Security Supervisor to obtain another password.

B. Security Violations

The following are examples of security violations:

- The input of incorrect CC SINON information.
- The input of a command code without an entry code or an invalid entry code.
- The input of a command that is not in the Employee Profile.

All security violations will be recorded in the security files by terminal and, if possible, by employee number.

#

[REDACTED]

#

C. Security Reminders

Employees should always clear the screen when the terminal operation is completed.

Employees should be sure to retrieve all prints. If someone leaves a print in the printer, it should be placed in classified waste if the originator cannot be determined.

IDRS terminals are programmed for real-time usage and are systematically deactivated at the end of each work day.

Note: The preceding rules must be followed carefully to protect the security and integrity of the IDRS.

The SFDIS Command Code with definer (values: P=Production, T=Training) is used to pull up the list of Command Codes in an employee's profile.

4 IDRS Message File

IDRS Message file is available to all IDRS users via command code MESSG followed by the users entry code. This multi page file contains up to date information on a variety of topics for example; command code availability, command code changes, MFTRA print status, ACTRA display status and system Files availability. An index of MESSG topics will be displayed. All IDRS users should make a point of checking the MESSG File every morning.

5 Selection Criteria for IDRS

Data is extracted for IDRS when the entity or tax module meets extraction criteria prescribed in IRM Handbook 2.9. Updated records are extracted for each module whenever Master File activity occurs in the account, such as merges, unpostables, notices, Tax Code postings (including adjustments and examinations), certain freezes, and status changes. The files are constantly updated from various sources until the record is removed from IDRS.

6 Retention Criteria for IDRS

Retention on the TIF is governed by the principle that a module should be retained as long as any one specified criteria is met, such as dummy modules less than 3 cycles old, accounts in TDA status, accounts in TDI status, modules containing any open pending transactions, and modules with open control bases. If a module no longer meets any retention criteria it is dropped from the file and a generated transaction is sent to MCC to inform the Master File that the module is no longer on that Campuses IDRS file. Specific retention criteria is included in IRM Handbook 2.9.

7 Pending Transaction Identification Codes/IDRS Merge Related Transaction Codes

A. Pending Transaction Identification Codes

Code Definition

AP	—A pending tax module transaction prior to PN status. This transaction will not have a complete DLN and may be reviewed by Quality Review.
CU	—A corrected unpostable transaction
*DC	—A transaction deleted by ERS or Campus Reject Processing.
*DI	—A delinquent or entity transaction which appears on IDRS, but does not post to the Master File.
*DJ	—A transaction deleted through normal weekly update.
*DN	—A transaction deleted by IDRS daily TIF batch processing. This pending transaction status normally occurs under the following conditions: <ol style="list-style-type: none"> 1. A transaction on the TIF other than a Unn or Nu did not match an incoming IDRS daily update on money amount. The transaction on the TIF changes to DN and the input transaction is separately appended. 2. An entity transaction on the TIF other than a Unnn or Nu failed to match an incoming IDRS daily update transaction on size (transaction length). The transaction on the TIF changes to DN and the incoming transaction is appended separately.

Code	Definition
*DP	—A transaction deleted by CC DELET, or has been a TP on TIF for 4 cycles or an age-pending routine change or a TP transaction failed to match daily update on money amount.
*DQ	—A transaction deleted by Quality Review.
DR	—Retained for research.
*DU	—A deleted unpostable transaction.
*DW	—A transaction deleted via optional age routine in the weekend IDRS computer batch processing (weekly updates).
EP	—A pending entity module transaction prior to PN status. This transaction will not have a complete DLN and may be reviewed by Quality Review.
ERS	—A RS transaction appended to the entity is identified as ERS when it is displayed with a tax module. Limited to TCs 903 and 904.
NU	—A nullified unpostable transaction.
PN	—A pending transaction that has passed all IDRS validity checks and has a complete DLN. All NMF transactions posted after establishment of module remain as PN.
RJ	—A reject transaction. RJ transactions are appended to the entity. They are displayed on the tax module if the MFT, Plan Number and Tax Period are for the displayed tax module.
Rnnn	—A transaction has been delayed beyond the scheduled cycle. It is extracted from the resequencing file at MCC. Includes all TC 904s and TC 903s (Refer to 8.14 for numeric code definitions).
TP	—A payment received in the Campus input to IDRS from the Remittance Processing System (RPS) with the cycle of input. It will not be included on a master file transaction tape until passing all validity and consistency checks and updated to "PN" status with the expected MCC posting cycle.
Unnn	—An open unpostable transaction (nnn - the numeric unpostable code).

*The pending transaction codes identified above with the asterisk will not be included in the IDRS balance.

B. Merge Related Transaction Codes

These differ slightly from those for the corresponding Master File transactions. The TC 003 and 026 are generated during IDRS processing, therefore they are not the actual MF transactions, but do reflect MF status.

TC	Description	Definition
003	BMF Partial Merge	Appears on the old EIN and contains a cross reference number. It indicates that a merge was attempted but was not able to become a complete merge because of modules in both involved accounts which are for the same MFT and tax period. The TC 003 will appear in "DI" pending status in the entity module.
004	BMF Partial Merge	Appears on the new EIN and contains a cross reference TIN. The TC 004 will appear in "DI" pending status in the entity.
006	A Merge/Merge	Fail. A TC 006 without a cross reference TIN indicates an unsuccessful merge. A TC 006 (preceded by a TC 005) with a cross-reference TIN indicates a successful merge from the cross-reference TIN.
008	IMF/BMF Complete Merge	Appears on the new TIN to reflect a successful merge and contains a cross reference TIN. The TC 008 will appear in "DI" pending status in the entity.
026	IMF/BMF Complete Merge	Appears on the old TIN to reflect a successful merge and contains a cross reference to the new TIN. It will appear in the entity module only in "DI" pending status.

8 Case History Status Codes

The following status codes are used when controlling a case. These status codes should not be confused with Master File Status codes or with freeze codes.

A	Assigned—Actively being worked	S	Suspense—Short term delay
B	Background—Non-workable case being monitored	M	Other—Long term delay
C	Closed	Z	Used to Close IRP Cases

9 Category Codes

The category codes are a 4 digit code to denote the type or source of an adjustment or correspondence case. For purposes of understanding the meaning of some of the column headings in the table below, the definitions are as follows: "Age" refers to the number of days given before a case defaults; "Recap Category" refers to the area assigned to work the case. A current list of the category codes and their definitions is given below:

11 North American Industry Classification System Codes (NAICS)

The North American Industry Classification System Code, formerly called Principal Industry Activity Code (PIA) will be self coded by the taxpayer on line B of Schedule C. The PBA identifies the nature of the taxpayers business and will appear on IDRS tax modules, IDRS module transcripts, and CC RTVUE. Additional references for these codes are included in Section 13, Subsection 9 of this book. or IRM 3.12.217-1.

12 Microfilm

All microfilm was not converted to Microfilm Replacement System. The unconverted microfilm will continue to be researched in the microfilm units.

Three types of microfilm information are available:

A. **CURRENT MICROFILM+m-**

These microfilms contain data which cannot be found by using MRS. They are updated periodically and include the following:

- (a) Partnership Name Directory-can be used to determine the EIN and Name Control of partnership entities. Once these have been determined, the DLN and return can be obtained through existing procedures.
- (b) EPMF National Alpha Register-is produced annually and contains a nationwide listing (in alphabetical order) of all the active entities on the EPMF.
- (c) Federal Tax Deposit Registers-The Federal Tax Deposit (FTD) transactions (Doc. Code 97) received at MCC are listed on microfilm FTD Registers. For each Campus, the FTD Registers list only the FTD transactions received from that Campus. Three registers are produced for each scheduled production period. Each register contains the same information but in a different sort sequence. The three registers are:
 - 1) EIN Register listed by EIN
 - 2) Amount Register listed by the payment amount
 - 3) Each FTD payment is accompanied by an FTD coupon which is microfilmed upon receipt in the Campus. This microfilm register is the third FTD register maintained in the Research function. Images of FTD coupon are retained on this microfilm register in sequence by microfilm serial number within a weekly cycle.

B. RETENTION REGISTER

These microfilms contain modules which are no longer carried on the Individual and Business Master Files. The Retention Registers require index information to be accessed; this information is found on the Reference Registers for prior to cycle 198401 located in the Microfilm Unit or in the retention register data section of certain types of MRS transcripts.

- (a) Retention Register (IMF/BMF)-The first IMF Retention Register was produced in January 1969 during the 1968 year-end conversion computer processing. The first BMF Retention Register was produced one year later. The format is identical to the Accounts Register except for the title and certain entity information. It contains all entity and tax modules removed from the Master File. The basic criteria for removal of a tax module are an assessed module balance of zero and the last transaction (including the return) has been posted 51 or more months, or the assessed module balance is credit and the last transaction (including the return) has been posted 60 or more months. When the last tax module is removed from the account, the entity module is also removed from the Master File to the Retention File. The Reference Register shows a "2222" as the period, and "R" in the Status Indicator position and the cycle of removal. Each tax module is also shown with the reference to the cycle of removal.
- (b) IMF/BMF will be researched using the DO and year. Some of the BMF MFT's placed on retention in cycle 197901 or earlier will be found by researching the Residual Master File (RMF) Retention Register Microfilm. No transactions can post to the tax period once the module has been removed.

Note: No new Retention Registers were produced for calendar years 1982 and 1983 due to the time period of inactivity extending to at least 52 months before dropping to the Retention Register. Production began again in 1984.

C. Archival Microfilm

These microfilms contain information which predate MRS.

13 Universal Access

Universal Access is part of the TSM effort to provide users the most current taxpayer data by providing on-line updates of taxpayer data from CFOL, the ability to view other SC TIP accounts, and the creation of a National Account Index (NAI) to keep track of the location of IDRS accounts.

Simply defined, Universal Access is part of the TSM effort to provide the user of an IDRS research command code with the ability to access and review TIF data on a remote Campuses TIF data base.

It is also the ability to Download or Refresh an account on the local IDRS TIF with data from CFOL.

It includes the creation of a National Account Index (NAI) to keep track of the SC location of IDRS accounts.

A. Universal Access Command Codes

The following command codes have Universal Access capability:

ACTON	CHKCL	ESTABS	IAPND	INTST	PIFTD	REINF	STAUP	UPCAS	VPARS	VRINT
AISDL	DMSDL	FFINQ	IAGRE	LETER	PIFTF	REMFE	SUMDL	UPDIS	VPMSG	XSINQ
AMDIS	DMSUL	FTDPN	IAORG	LPAGE	PIVAR	RFINK	SUMRY	UPTIN	VRIAG	
ATINQ	ENMOD	FTPIN	IAREV	MESSG	PLINF	RFRTM	TDINQ	URINQ	VRIAO	
KAFRM	ERINV	IADIS	ICOMP	PICRD	PLINQ	RPINK	TXMOD	USIGNR	VRIAR	
CFINK	ERSDL	IADFL	ITDLN	PIEST	PTINQ	SCFTR	UNLCE	USIGNT	VRSTA	

B. National Account Index (NAI)

The NAI is an index of tax module and entity information that can be found on the IDRS nationwide.

- When the inquiry command code (mentioned above) fails to find the requested information on the local TIF it will then “default” to access the NAI. If the requested information cannot be found on the NAI, the CFOL files will be accessed to find the requested information.
- If a tax module or entity module exists on the NAI, the requesting input screen will be displayed as the new input display screen with the addition of the remote Campus abbreviations and location codes on lines 22 and 23.
- If a tax module or entity is not on the NAI but can be found on CFOL and is online, then a MFREQ input screen will be displayed. MFREQ will immediately bring the entity/tax module on line to the originating Campus.
- If a tax module or entity information is on the master file, but is not on line for BMF, then a BMFOLM screen with the message NO DATA FOUND AT LOCAL SITE - NAI - INPUT REQUEST FOR CFOL DATA on line 23 will be displayed to request that the data be placed on line the next day.
- The following collection update command codes can also be used at remote sites: LEVYD, LEVYE, LEVYR, LEVYS, TDIAD, TSIGN, TELEA, TELEC, TELED and TELER.

C. NAI/IDRS Timing

Lag time will exist between the time that MF, CFOL and NAI are updated to the time that the TIF is updated.

There is also a lag between the time TIF retention drops an account locally and the time NAI is updated with this information.

This lag time could give the appearance that something exists on a SC TIF when in reality it doesn't.

In these cases the remote access command code would give back a “NO DATA FOUND” message.

When data does not exist on the local TIF but exists on CFOL CC MFREQ may be used to download the account information from CFOL to TIF.

When data exists on TIF but is not as current as CFOL a refresh update or reconciliation of the account may be performed using a new command code called RECON.

Account currency will be determined by comparing the Last MF Extract Cycle of the TIF account to that of the CFOL.

If they are equal no update will take place but an appropriate message will be returned.

If CFOL is more current, then the TIF account will be refreshed with the more current CFOL data.

Entity only or single module Download requests be input.

D. TC902's

Every time that an account is downloaded or reconciled using CC MFREQ or RECON a TC902 will be generated to MF. This TC902 will let MF know that the account is now resident on IDRS and where. It will also cause MF to reanalyze the

module and send a current update back to IDRS.

A mini-weekend analysis will also be performed for each account downloaded or updated through CC MFREQ or RECON.

E . 10 days to 10 seconds

This whole process should accomplish in ten seconds what current MFREQ TC902 processing does in ten days.

F. Profile Restrictions

The remote access command codes would be used prior to making taxpayer contact or after the taxpayer has initiated contact to determine the current overall status of the account.

Once account research is completed the MFREQ/RECON command codes would be used to establish or update a local account prior to making or inputting an account adjustment.

MFREQ/RECON should not be used to download data for the sole purpose of researching. Remote access or CFOL command codes should be used for this purpose.

Note: Download capability from CFOL will not be available during Dead Cycles (cycles 1 through 4). Initially only IMF and BMF will be available for CFOL download. EPMF will be available at a later date. NMF accounts will not have update capability because they have no associated Master File or CFOL.

G. Direct Remote Access

IDRS users will have the option of directly routing a command code request to a remote Campus by manually inputting the CC information followed by the routing symbol (@) and the two digit Campus location code and transmitting.

This will provide file research functionality with files that are physically located in remote centers.

No adjustment, credit transfer or transaction type input command code will be allowed as this functionality is currently available locally. This service will effectively consolidate Security Processing at the local level and provide a National Password for IDRS users.

Users will have to determine beforehand which SC location they want to route to. How this determination is made will be dependent on each individual case and what data is needed.

H. IDRS Command Codes Job Aid

Many screen displays and field definitions for command codes reside in this helpful tool located at the SERP web site on the intranet. The web address is:

http://serp.enterprise.irs.gov/databases/irm-sup.dr/job_aid.dr/command-code.dr/idrs_command_codes_job_aid.htm

Because command code information can be obtained from the address mentioned above, this document will no longer be providing the screen displays with field definitions.

Section 15 – Other Systems: CADE, CADE2, SCRIPS, CFOL and FTD

1 Nature of Changes

Description	Page No.
15A – Customer Account Data Engine (CADE)	15-1
15B – Customer Account Data Engine 2 (CADE2)	15-2
15C – Service Center Recognition/Image Processing System (SCRIPS)	15-3
15D – Corporate Files Online (CFOL)	15-4
15E – Federal Tax Deposit System (FTD) - Formerly Section 10	15-17

15A - Customer Account Data Engine (CADE)

Summary - Current CADE has provided a foundation for modernized systems. Building on current CADE, the Internal Revenue Service will have the flexibility to respond more quickly to complex tax law and policy initiatives-changes that the existing Master File system cannot currently make easily or cost-effectively accommodate.

Current CADE Release 4.2 deployed on January 15, 2009 and added the capabilities to process certain revenue receipt transactions, extension (Forms 4868), and last name changes.

A revised program strategy is under development which will leverage several years of successful current CADE implementation by converting IRS's existing Individual Master File (IMF) into a daily processing architecture by migrating all core tax account processing to a target application architecture and relational database structure. Customer Account Data Engine will allow quicker data conversion than a sequential conversion of source data and will enhance IRS's ability to address technology security, financial material weaknesses, and long-term architectural planning and viability.

More information can be found at CADE's web site located via the intranet at:

<http://bsm.web.irs.gov/CADE/FactSheets/FactSheetCADE1.htm>

15B - Customer Account Data Engine 2 (CADE2)

1 Background

The Customer Account Data Engine 2 (CADE 2) will leverage existing systems and components, including Individual Master File (IMF) applications, to perform functions related to accessing and updating taxpayer account data, managing cases and resolving account issues. It will implement a single system that uses a relational database to process on a daily basis accounts that are currently supported by IMF and current CADE. Additionally, the Customer Account Data Engine 2 will address relevant financial material weaknesses and security weaknesses associated with core tax account processing.

2 Implementation

The CADE 2 implementation involves three phases:

Transition State 1, the IRS will establish a single database that will house all individual taxpayer accounts. Processing will be enhanced to include daily batch processing. The key IRS customer service operational database, IDRS, will have the benefit of more timely posted data. The solution will populate the IPM analytical data store and provide business users with tools to more effectively use the data for compliance and customer service. Enhanced data security will be in place. Note that downstream systems that must be modified to support daily processing are included in the scope of Transition State 1. Downstream systems that do not need to be modified, but wish to take advantage of daily processing are not included in the scope of Transition State 1.

Transition State 2, a single processing system will be in place. Applications will use the taxpayer account database. The solution will leverage elements of current IMF and Current CADE for some functions. The CADE 2 Program will make continued progress addressing the financial material weaknesses. In Transition State 2, a combination of current-state components and transitional components will be used to fill the functional needs of individual taxpayer account processing.

Target State, completes the transition to the target-state applications and database, provides a complete data-centric solution, retires all transitional components and addresses all financial and security material weaknesses identified at the inception of the Program.

More information can be found at CADE 2's web site located via the intranet at:

<http://mits.web.irs.gov/CADE2>

15C - Service Center Recognition/Image Processing System (SCRIPS)

SCRIPS is an Image Processing System that processes FTD, IRP, Schedule K-1, Form 940 and Form 941 applications in four submission sites. The submission sites are Austin, Cincinnati, Kansas City and Ogden Campuses. SCRIPS provides character recognition, automated numbering and code & edit functions, minimizing operator workload and maximizing processing throughput. SCRIPS stores and retrieves digitized images of the document. SCRIPS interfaces with BBTS to control the documents for processing and with IDRS allowing images of the documents to be requested via Command Code ESTABS. The following forms are scanned and processed by SCRIPS at the centers indicated:

FTD	All four centers
IRP	Austin and Kansas City
Form 1041 Schedule K-1	Cincinnati and Ogden
Form 1065 Schedule K-1	Cincinnati and Ogden
Form 1120S Schedule K-1	Cincinnati and Ogden
Form 940	Cincinnati and Ogden
Form 941	Cincinnati and Ogden

Additional and more specific information on SCRIPS processing can be found in following published IRM's:

FTD Processing on SCRIPS	3.41.268
IRP Processing on SCRIPS	3.41.269
General Processing via SCRIPS	3.41.274

15C - Corporate File On-Line (CFOL)

1 Summary

- CFOL provides NATIONWIDE access to information processed through any Area Office/Campus and posted to any of the master files.
- CFOL command codes provide on-line access to master file information, residing at MCC/DCC, via IDRS.
- CFOL command codes are available even when IDRS is not.
- CFOL command codes are for research only capabilities (cannot adjust accounts).
- CFOL command codes will not show pending transactions, case controls, history items or unpostables. Therefore, IDRS research should be done prior to accessing certain CFOL command codes.
- Additional reference information for the CFOL command codes can be found in IRM 2.3 and at the SERP website under Job Aids.

Help For CFOL:

Any CFOL command code with the definer "H" will display the help screen for that command code (i.e. BMFOLH).

Note: This will change as paging capabilities become available.

3 Taxpayer Information Available from CFOL Command Codes

The value of CFOL as a research tool is its capacity to provide taxpayer information on any valid TIN nationwide. CFOL is especially helpful to revenue officers conducting courtesy investigations or otherwise investigating taxpayers who reside out of state. The categorical index that follows is intended only as a partial guide to the types of information available. Further information about CFOL can be found in Multifunctional Handbook 2.3, various chapters. Revenue officers who utilize the CFOL command codes regularly will discover new and effective ways to obtain the information they need to resolve their cases.

FTD - Federal Tax Deposit System (FTD)

1 General

IRM 20.1.4.0 Failure to Deposit Penalty.

Federal tax deposits must be made by electronic fund transfer. Beginning January 1, 2011, business must use electronic funds transfer to make all federal tax deposits (such as deposits of employment tax, excise tax, and corporate income tax). Under regulations 153340-09 effective 1/1/2011, Forms 8109 and 8109-B, Federal Tax Deposit Coupon, cannot be used after December 31, 2010. Electronic fund transfers can be made using the Electronic Federal Tax Payment System (EFTPS), tax professional, financial institution, payroll service, or other trusted third party.

Taxpayers would be subject to a failure to deposit (FTD) penalty for having deposited in an incorrect method (EFT/FTD Penalty). This is the same penalty received by taxpayers for not making a coupon deposit through an authorized depository (FTD avoidance penalty).

PATAX in October 2000, Treasury Tax and Loan (TT&L), the former system used to process FTD payments, was replaced with PATAX (Paper Tax). The PATAX system consolidated FTDs into one Federal Reserve Bank (FRB). The Federal Tax Deposit (FTD) System allowed the taxpayer to submit payments through the use of a depository bank that had PATAX or Transaction Interface Package (TIP) account with the ST. Louis FRB. In processing the FTD at the Submission Processing Center, the input data was processed through a series of daily batch runs that perform block balancing and document validity checks. Reports were generated showing all documents and revenue being processed through the batch runs. PATAX System was decommissioned on 2011.

ADEPT was the Service's first EFT program. It was piloted from 1989 to 1991 in the Andover Campus.

TAXLINK began accepting nationwide federal tax deposits electronically in 1992 through Atlanta Campus. These deposits were not processed through the FTD system. Instead TAXLINK deposits went through GMF. Transaction and document codes were the same as though processed through the FTD system. These deposits are identified by their file location code (FLC 65). Taxpayers enrolled in TAXLINK will be rolled into EFTPS. Electronic deposits made after November 3, 1996 must be made through EFTPS.

EFTPS - Electronic Federal Tax Payment System (EFTPS), is the government's current system for accepting federal tax payments electronically. EFTPS is not limited to accepting only FTD deposits but can accept all tax payments. EFTPS was certified for operation October 18, 1996 at the Tennessee Computing Center.

Microfilm Serial Number

The first two digits of the Microfilm Serial Number (MSN) identified the Campus which processed the FTD (for Forms 8109 or 8109-B (paper forms).

The third and fourth digits represented the OCR/SCRIPS cycle in which the FTD coupon was scanned (01-53 represented paper forms, such as Form 8109 and Forms 8109-B). As of July 2000, the Campuses have eliminated the magnetic tape process.

The remaining six digits (OCR) or eight digits (SCRIPS) were a sequential serial number assigned during the scanning operations or mainline operations.

2 SCCF, BOBs, Error Register, Classification and Reversals of FTDs

The FTD programs were at the following Submission Processing Centers: Austin, Cincinnati, Kansas City, and Ogden and Memphis.

- (A) Service Center Control File (SCCF)** — The primary purpose of the SCCF is to balance and control all transmittals (FRB and IRS) processed by the FTD Mainline System. If the FTD has not successfully processed through the SCCF, the FTD will not be released to the Tape Edit Processing (TEP) for posting on the master file. Transmittals that are rejected or deleted at TEP are corrected on the SCCF Invalid Posting Transcript. Transmittals that have cleared the SCCF are processed on the SCCF Historic and the Block Completion List during month end processing.

(B) Blocks out of Balance (BOBs) — FTDs are balanced to ensure that individual FTD amounts agree with the transmittal (AOC) amount. Blocks that are out of balance appear on the FTD BOB Register for corrections, adjustments and/or re-inputs. Corrections and adjustments are sent to ISRP for input. Re-inputs are sent to SCRIPS for re-scanning, re-serializing and re-filming. Blocks that are on the FTD BOB Register are neither reported on the classified reports or TEP, however, they are controlled on the FTD SCCF.

(C) FTD Error Register — FTD Error Register contains the elements of each FTD coupon that cannot pass validity checks within the FTD System. A record on the FTD Error Register will consist of two lines. The first line is the document identification information. The second line is the employer identification information. Money on FTD coupons on error register has already classified."

(D) Classification — FTDs are classified into tax classes as they are released from SCRIPS. They are also balanced with the St. Louis Federal Reserve Bank (FRB) verification records. Effective October 23, 2000 the St. Louis FRB will be the only FRB to process FTDs. Blocks that are not in balance with the St. Louis FRB require adjustments to the Paper Tax (PATAX) Account or Transaction Interface Package (TIP). The account is maintained at authorized Treasury Tax & Loan (TT&L) depositories. The classification of tax classes is reported on the FTD Daily Wire by FRB batch date. The tax class amounts are reported to the Treasury and used for reporting to the various trust funds.

(E) Reversals — Authorized TT&L depositories submit reversal requests to the St. Louis FRB to process reversals for incorrect amounts and ISRP honored checks. The request is forwarded to the Campus to adjust the taxpayer's account and the TT&L account. Requests that result in overpayment of taxes and payment made in error by taxpayers are not accomplished through this process.

3 FTD Deposit Requirements and Penalties

Because of the increasing complexity of this program and the many dates and amounts involved, IRM 20.1.4.11.1., Failure to Deposit Penalty (FTD), should be referenced for details.

Definition or Example

Lookback Period - a period of historical return filing(s) used to determine which deposit schedule a taxpayer must follow when making current year payroll tax deposits

for quarterly returns:	for annual returns:
the total original employment tax liabilities from tax periods between July 1 and June 30	the total original employment tax liability from the second previous tax return period.

Deposit Schedule - The schedule an employer follows to determine (a) the length of the deposit period over which liabilities are accumulated and (b) when the deposit is due. Since 1-1-1993, the deposit schedules have been called either Monthly or Semi-weekly. Refer to IRM 20.1.4.8.

Accumulated Liability - the sum of tax liabilities from each individual payroll(s) within a deposit period. The amount that must be deposited. (Deposit Liability)

Deposit Period	for taxpayers following a monthly deposit schedule, the deposit period covers:	for taxpayers following a semi-weekly deposit schedule, the deposit period is either:
	a calendar month	Sat., Sun., Mon. & Tues. *****OR***** Wed., Thur. and Friday

Banking Day - Deposits are due only on banking days. Banking days are days other than Saturday, Sunday, Federal holidays or state banking holidays.

Safe Harbor - Use of the safe harbor rules has been expanded to all depositors. An employer is required to deposit 100% of the deposit liability on or before the deposit due date. Regulations provide a safe harbor, (safety net option) if the employer cannot deposit the full amount required. An employer will still be considered to have met their deposit obligation if the underpayment/shortfall (the difference between the required deposit liability amount and the actual amount of the deposit) is less than the greater of \$100 or 2% of the required deposit. The shortfall is treated as a new, unique, separate liability, arising from its own separate deposit period and carrying its own deposit due date. The shortfall due date is determined by the deposit schedule followed.

DeMinimus Rule - Employers handling payroll taxes are required to deposit those monies. Failure to use electronic funds transfer to make all federal tax deposit or to deposit in the correct manner will subject the employer to a FTD penalty equal to 10% of the amount incorrectly submitted. However, if the total return liability is less than \$2,500, the employer is relieved of the burden of making small deposits and may submit a check (to the IRS) for the full amount of the tax liability with their return without incurring a FTD (failure to deposit in the correct manner) penalty.

Application of Payments—

Credits are ordered by the date received. Multiple credits of the same transaction code received the same date are combined into one credit amount. Valid credits include TC 610, 650, 670, 700, 760, 710 and 716. Liabilities are ordered by the due dates. Multiple liabilities arising from the same deposit period are combined into one liability. Multiple liabilities, from various deposit periods, with the same due date are further ordered by their incurred date. For periods after December 31, 2001, deposits are applied to the most recently ended deposit period or periods within the specified tax period to which the deposit relates as provided for in Rev. Proc. 2001-58. The application of deposits to the most recently ended deposit period will, in some cases, prevent the cascading penalties where a depositor either fails to make deposits or makes late deposits. See the job aid on the "Most Recent Payment Allocation Method" located in Chapter 7 of IRM 21.

4 Computer Codes

(A) Penalty Computation Codes (PCC)

- (1) Computation codes are used to show why Master File computed a penalty on the account. These codes also indicate what penalty explanation text is printed on balance due notices.
- (2) The following codes are associated with the FTD Penalty. The PCC is ISRP SCRIPS displayed with the literal "FTD PEN" below the TC 186. The FTD penalty PCCs are written so that only one PCC is needed to describe the reason(s) why the FTD penalty was assessed. See section 8(4) BMF Reason Codes for additional detail.

Transaction Code	Return with good ROFT Information	Return with invalid or no ROFT	\$100,000+ account	-\$100,000+ account	
All "good" TC 650	PCC 003	PCC 011	PCC 058	PCC 054	PCC 057
All TC 670 and/or "bad" TC 650	PCC 041	PCC 043	PCC 058	PCC 055	PCC 057
Mix of TC 610, "good" 650, "bad" 650 & 670	PCC 042	PCC 044	PCC 058	PCC 056	PCC 057

- "good" TC 650 is a deposit made as required: by coupon through an authorized depository or in the case of a mandated taxpayer, a deposit made via EFT.
- "bad" TC 650 is a non-EFT deposit made by mandate (taxpayer required to deposit electronically.)

- (3) PCCs are required when manually computing or adjusting the penalty (TC 180 input with a significant dollar amount). Indicating the computation method used will continue the processing audit trail and reduce the need to request previous case files when responding to incoming correspondence or calculating subsequent adjustments.

(4) When resolving a SIC 2 return, if the penalty abatement (due to reasonable cause) request that came in with the return is denied, remember to enter Reason Code 062 in the first reason code position (and the appropriate PCC) and issue Correspondex Letter 854C, *Penalty Waiver or Abatement Disallowed/ Appeals Procedure Explained*.

(B) Penalty Reason Codes (PRC)

A PRC is required to indicate why a penalty is being abated (penalty relief is granted) or suppressed. Refer to IRM Exhibit 20.1.1-3 and Section 8.16.3 of Doc. 6209 for details.

(C) Schedule Indicator Codes (SIC)

When existing conditions would prevent the computer from being able to complete systemic processing, SICs are edited onto the return during initial return processing. Master File's recognition of these codes generally results in the creation of an internal transcript which requires manual intervention to complete the processing of the return.

The SIC Codes applicable to FTD Penalty processing are as follows:

Sic Code	199212 & prior	199312	199412	199512 & subsequent
0 computer generated	return processed with good information	return processed with good information	return processed with good information	return processed with good information
1	missing information, penalty computed by averaging available information	missing information, penalty computed by averaging available information	missing information, penalty computed by averaging available information	missing information, penalty computed by averaging available information

2	Safe Harbor checked or reasonable cause claimed	reasonable cause claimed	reasonable cause claimed	reasonable cause claimed
3	Backup withholding (BWH)/Church Social Security issue	Schedule A attached (BWH)/Church Social Security issue	Church Social Security issue	Church Social Security issue
4	1st time occurrence of 3 banking day requirement	not applicable	not applicable	not applicable
5	Schedule B attached	not applicable	not applicable	not applicable
6	\$100,000 account	\$100,000 account	\$1000,000 account	\$100,000 account
7	not applicable computer generated	not applicable	not applicable	incomplete information, causing averaging on a \$100,000 account

(D) Manual

PCCs are required with each TC 180 input with a dollar amount. This will indicate the computation method used and eliminate the need to request previous case files when responding to incoming correspondence or calculating subsequent adjustments. See IRM 20.1.7, IDRS Terminal Input, for input instructions of the PCCs listed in (1) above.

Reason Code 062, the reasonable cause indicator, is not affected by the input of the above codes and still must be input whenever reasonable cause applies. It may be used alone (for abatements) or with any of the above codes when reasonable cause is being denied and a penalty is being manually assessed/asserted. RC 062 is entered in the first position; the applicable PRC must be entered in the fourth position.

5 FTD Credit Module

In January 1987 to address excess FTD payments received by the IRS, the FTD credit module was established. Payments placed in the credit module are systemically analyzed for proper application as subsequent tax returns are processed. Additionally, the credit module can be researched on IDRS or with master file transcripts, for possible manual application of the payment(s).

The transfer to the FTD credit module occurs automatically as a default procedure during the rollover analysis. If the excess credit amount equals (within \$1.00) the amount of one TC650/660 (Doc. Code 97) transaction with a transaction date equal or prior to the tax period ending (minus 5 days), the TC650/660 will automatically transfer into the next subsequent account or into/establish (if the first one) the FTD Credit Module.

The module can only be established through the rollover analysis.

The FTD Credit Module can be recognized by the presence of MFT-01 and the tax period-0000, and will always be the first tax module present on the account. The presence of MFT-01 has no other meaning than to allow this module to be placed first in the record.

The module is researchable on IDRS and through MRS request.

During Rollback analysis the FTD Credit Module will be analyzed for a single unreversed TC650/660 (Doc. Code 97) equal (within \$1.00) to the excess credit claimed in the tax module being addressed. If a satisfactory credit is found a TC652/662 (reversing transaction) will post to the FTD Credit Module with the following elements from the satisfying TC650/660 transaction:

- (1) Document Locator Number (DLN) with 99 in the 9th & 10th positions
- (2) Transaction Date
- (3) Amount
- (4) Microfilm Serial Number

A TC650/660 will also post to the gaining module with the following elements from the reversed credit module:

- (1) DLN (with 99 in the 9th & 10th positions and the correct tax class)
- (2) Transaction Date

Any line marked with # is for official use only

(3) Amount

(4) Microfilm Serial Number of the TC650/660 being reversed in the FTD Credit Module

An AM Research Transcript will be generated every 26 cycles for the earliest transaction remaining unreversed in the FTD credit module. Refer to IRM 3.5.17.

If there are any debit modules anywhere in the taxpayers account, criteria for unpostable 305 will apply.

Questions and Answers

Q. Is it possible to manually transfer out of the FTD Credit Module?

A. Yes (reference IRM 3.17.243)

Q. Is there a tolerance on the amount of the deposit transferred manually out of the FTD Credit Module?

A. Yes, in that the exact amount of the deposit transaction must be transferred. Exception: A partial transfer can be made if the transaction is to a consolidated FTD.

Q. What will show as a history record if the credit is manually transferred to another account?

A. The reversal transaction will appear as a TC652/662 followed by the cross reference TC586 with TIN, MFT and Tax Period.

Q. Can a refund be generated or manually issued from the FTD Credit Module?

A. No. The amount must be transferred out and then refunded.

Q. Can a return ever post to this module?

A. No. A return cannot post to this tax module; it is a storage module.

Q. What will address this credit module?

A. The module will be created through the rollover analysis and can be transferred during rollback analysis or through a manual transfer.

Q. Will there ever be a time when the FTD credit module will be in zero balance?

A. Yes, this is possible if all the deposits in the FTD credit module are transferred out, either automatically or manually.

Q. Is the format of the FTD Credit Module different than the tax module?

A. No, the format is essentially the same.

2013 BMF Accelerated Paper-Filed Refund Cycle Chart

This chart identifies accelerated refund cycles for paper-filed **BMF** and **BMF non-accelerated cycles**.

Note: IMF refunds are no longer part of the accelerated cycle process since they are issued on a daily basis as a result of CADE 2.

Note: EFTs are not part of the accelerated cycle process; they are only displayed here for FMS' purposes. Publication 2043 shows the E-file Refund Cycle Chart.

- BMF accelerated cycles differ depending on the type of tax return filed - Form 1120 or Form 1041.
- *** BMF non-accelerated cycles** are shown separately to reflect pay dates for BMF paper refunds that are not accelerated in a particular cycle. BMF regular non-accelerated cycles are displayed with * and will contain a blank space in the row.
- ****Accelerated cycles**
- **CAUTION: No refund intercepts (i.e. HAL HOLDS or NOREFs) are allowed during accelerated refund cycles.**
