

New and Improved IRS ECO Tool Features Have Launched!

The Internal Revenue Service (IRS) listened to your feedback and added features to the IRS Energy Credits Online (IRS ECO) tool. These new Registrant-focused features expand the capabilities for Elective Payment & Transferability and enhance the way the IRS does business.

Enhanced & Secure Communications

- › Two-way messaging to communicate directly with the IRS via a secure messaging platform.

New Energy Credits

- › Register for new credits including clean fuel production (45Z), clean electricity investment (48E), and clean electricity production (45Y).

Property and Facility Upload Improvements

- › Upload multiple property templates throughout the registration period to receive registration numbers throughout the year.

Registration Number Download

- › Download assigned registration numbers and property data.

Multi-Year Support

- › Submit for multiple years and view prior years' registrations.
