Subject: RE: potential Westbrooks-

This is not a Westbrooks case because restitution was imposed as an independent part of the sentence pursuant to a plea agreement. However, the government is only one of the victims of the crime in count . Where there are victims other than the government, the government is only paid after the other victims have been paid. Accordingly, the government cannot collect on the restitution-based assessment until the non-government victims have been paid.

Please call if you have further questions on this matter.
